

ECO 4 FLEX ONBOARDED

INSTALLER LIST

NOTE:

Householder:

The householder is responsible for any works contract entered into for measures proposed in their home through their chosen installer. Household are free to approach any participating installer of their choosing and it is recommended that they research installers they may wish to consider. Household are responsible for any contribution toward costs of works as identified by the installer. Household are encouraged to carry out their own checks before having works done to their home. These include sense checks such as:

- Checking if you need permission or approval
- Getting a range of quotes from participating companies for comparison
- Checking the contractor has appropriate insurance in place
- Getting a written contract with clear terms and conditions
- Know how to contact the installer should problems arise

More information about this is available via Citizens Advice

Householders are encouraged to research installers before making decisions. This can be done through reading reviews on the TrustMark website, a government endorsed quality register, other third-party review websites or by asking for recommendations or references of similar work recently undertaken.

Please note that as the Council's role is limited to householder eligibility checks. Leicestershire County Council does not commission or contract with installers. Any works agreed to by a household are a contract between the householder and installer. The Council carries out basic due diligence checks to confirm that installers participating in the mechanism locally have accreditation to deliver ECO funding. The Council does not hold ECO funding and is not the decision maker whether measures can be offered utilising ECO funding.

Where issues arise with an installation these should first be raised with the installer. Where a satisfactory outcome cannot be realised consider the following support and guidance available. Leicestershire County Council cannot assist in complaint resolutions regarding ECO funded installations.
