Resident / Neighbour to the Zouch Bridge replacement scheme

Dear Resident / Neighbour to Zouch Bridge,

Replacement of Zouch Bridge A6006 over River Soar

Overnight road closure

We are writing to advise of a second overnight road closure on the 10th September, for this night only. This is for a second steelwork delivery from Belgium, which will be transported in 3 deliveries, with a police escort on the A6006, from the junction to the site compound.

This will necessitate a **temporary road closure overnight**. This has been granted on Zouch Road, Hathern between the junction with Derby Road and Zouch Bridge. There will be a signed diversion route, during the hours of 7pm-6am on the night.

The road needs to be closed during this time because the transport vehicles must reverse onto site as they are too large to turn. They will be parked on the incoming road for a period until received onto our site compound.

Emergency access will be maintained for the whole duration of the closures.

There will be traffic marshals on duty overnight in case any residents who need direct access onto the road need to access / exit during these hours, but please note this will not be possible whilst the transport vehicles are moving. The police will be in attendance at the A6 junction.

We apologise for any inconvenience caused and thank you for your patience while we continue to work on this historic bridge replacement.

If you have any questions, please contact ZouchBridgeEnquiries@ericwright.co.uk

Best wishes,

Lesley Davison
