Appendix C Accident Data

1.0 INTRODUCTION

- 1.1 This Transport Statement has been prepared on behalf of Mick George Limited to consider the highway and transport implications of a potential quarry project on land west of Pincet Lane, North Kilworth.
- 1.2 The duration of the project will be over an envisaged 13 year period. An indicative site layout plan is included in **Appendix A**.
- 1.3 Access to the site is proposed from Pincet Lane via a priority T-junction. Two potential options have been considered. Traffic flow and speed data on Pincet Lane have been assessed to determine the most suitable access design.
- 1.4 The traffic generation associated with the site will be an average of 80 movements per day. As a worst case scenario, a daily maximum of 160 movements have been considered in the assessment.
- 1.5 The conclusion of this report is that the site will not generate a significant number of additional movements on the local network and the overall impact on Pincet Lane will not be material.

2.0 SITE LOCATION AND LOCAL NETWORK

2.1 Description

2.1.1 The site is situated to the west of the B5414 Pincet Lane in North Kilworth. A location of the site is included in **Figure 1**.

2.2 Local Road Network

2.2.1 Pincet Lane is a single carriageway rural road which runs in a north to south direction to the north of North Kilworth. The B5414 extends north from the A4304 at North Kilworth past the site linking with the A5199 to the north of the site. The junctions on the B5414 to the north and south take the form of a simple priority.

2.2.2 There are no designated footways or street lighting within the immediate vicinity of the site. The speed limit is de-restricted within the vicinity of the site.

2.2.3 The A5199 provides access to Husbands Bosworth to the south east and further to the south access to the A14. To the north the A5199 provides access to Leicester. The A4304 to the west of North Kilworth provides access to the M1.

2.3 Local Traffic Patterns

2.3.1 An Automatic Traffic Counter (ATC) was installed on Pincet Lane to the north of the proposed site access. The results of the count are included in **Appendix B**. A summary of the traffic count and speed data are shown in **Tables 1 and 2** respectively. HGV traffic account for around 8-9% of daily traffic movements which equates to an average of 213 HGVs over a working day.

Table 1 – Traffic Flow Data (5 day average)

Direction	AM Peak	PM Peak	24 Hour
Northbound	68	200	1,323
Southbound	161	75	1,261
Total	229	275	2,584

Table 2 – Speed Data (mph)

Direction	85 th percentile	Average
Northbound	54.2	46.4
Southbound	54.2	46.8

2.4 **Road Safety**

- 2.4.1 The accident record for the last 5 years has been obtained from Leicestershire County Council. The data are included in **Appendix C**.
- 2.4.2 A total of 7 accidents have been recorded within the study area, of which 6 were classed as “slight” and 1 as “serious”. Two of the accidents occurred on Pincet Lane within the immediate vicinity of the site. The remainder occurred on the A5199 to the north of the site or on Pincet Lane further to the south.
- 2.4.3 The “serious” accident involved a goods vehicle <= 3.5 tonnes and occurred on Pincet Lane opposite the track to Bosworth Grange Farm. The goods vehicle lost control on an icy road and left the carriageway. No other vehicles were involved.
- 2.4.4 None of the other accidents involved goods vehicles. One “slight” accident involved a motorcyclist who lost control whilst negotiating a bend in the road. This occurred at the A5199 junction with Pincet Lane.
- 2.4.5 There are no existing road safety issues on the local road network which need to be addressed as part of the development proposals.

3.0 DEVELOPMENT PROPOSALS

- 3.1 The proposals are for mineral extraction on the site for an estimate of 2.5 million tonnes. At a typical extraction rate of 200,000 tonnes per annum this would give a working life of 13 years.
- 3.2 The site will be restored using a combination of on-site residual quarry waste and suitable inert material. In total, some 1.5 million cubic meters of imported material would be required to restore the site close to existing levels.
- 3.3 The site access will be from a new junction onto Pincet Lane (B5414), to the east of the mineral processing area. The two options for access have been considered and are shown on **Figure 1**. An access road of 7.3m has been designed with 15m radii.
- 3.4 Visibility splays in accordance with vehicle speeds on Pincet Lane have been considered. Based on a speed of 54.2mph, using DMRB parameters, a sight stopping distance of 155m should be provided. This can be achieved at both locations as shown in **Figure 1**. A forward visibility distance for right turning traffic of 155m can also be achieved. At access point B it is understood there are no third party land constraints.
- 3.5 The access junctions have been tracked with a large tipper in **Figure 2**. This shows that two-way movements at the access can be accommodated.

4.0 TRAFFIC IMPACT

- 4.1 It is anticipated that the minerals will be exported at a typical rate of 4,000 tonnes per week and assuming a 20 tonne pay load this equates to 40 loads (80 movements) per working day.
- 4.2 Imported restoration material would in practice double this figure, but a high proportion of imported material will be "back-loaded" which would reduce overall traffic movements to a total figure of 120 movements. However, as a worst case, 160 movements per day have been considered.
- 4.3 Assuming around 10% of traffic occurs during peak periods, this equates to around 16 movements per hour. This equates to around a 6% increase in existing traffic levels on Pincet Lane. This is within the variation of background traffic on Pincet Lane which are shown to be around 6% on a typical weekday from the ATC results.
- 4.4 In terms of link and junction capacity, given the low background traffic levels on the local network the additional traffic is not likely to result in a significant impact.
- 4.5 Design Manual for Roads and Bridges TD 42/95 sets out guidance for the form on major/minor priority junctions. Figure 2/2 suggests that a simple T-junction is appropriate where a flow on the minor road link does not exceed 250 movements a day and a flow on the major road link does not exceed 13,000 a day. On this basis, the proposed access design is appropriate to serve the site.
- 4.6 In terms of distribution of traffic, it is anticipated that the majority of vehicles will route to and from the north of the site towards the A5199.

5.0 CONCLUSIONS

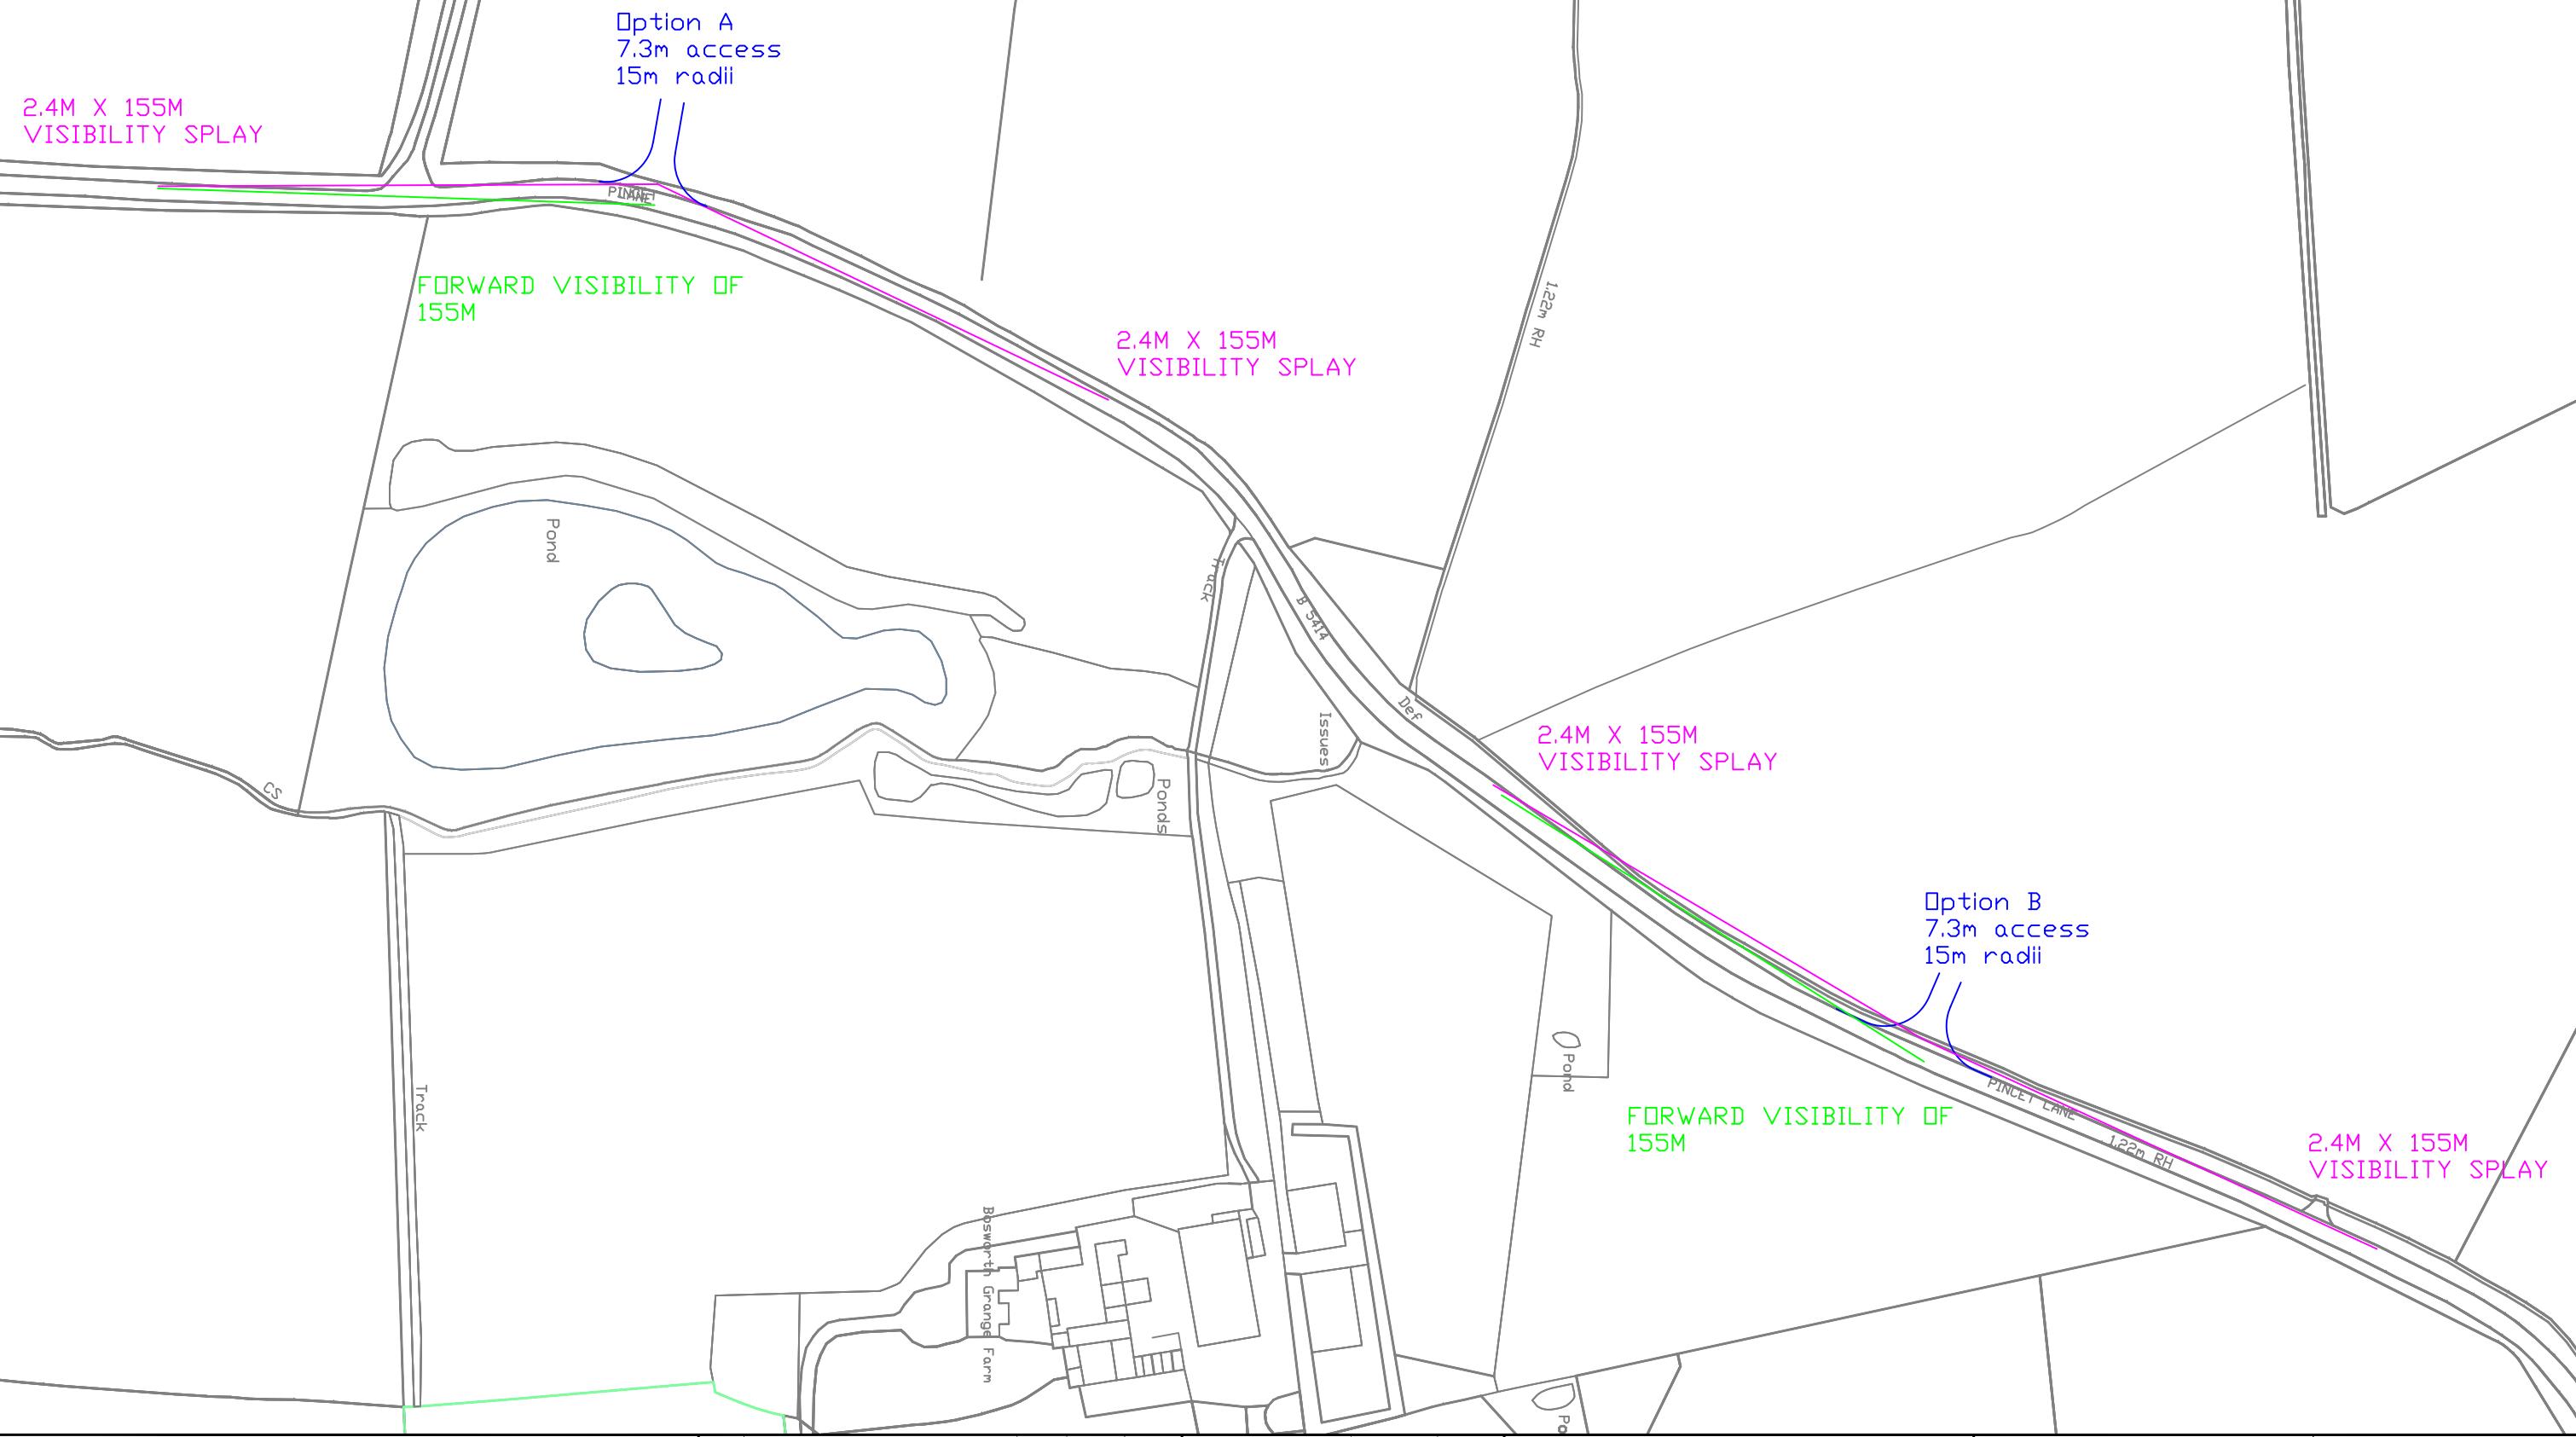

- 5.1 This report has been prepared on behalf of Mick George Limited to review the transport implications of the proposals for a mineral extraction site on land to the west of Pincet Lane, North Kilworth.
- 5.2 The proposals involve the extraction of 2.5 million tonnes of material which, at a typical extraction rate of 200,000 tonnes per year would give a working life of 13 years. Based on a typical working week this equates to 40 loads or 80 movements a day. Assuming a level of import of material together with potential back-loading of lorries a maximum traffic generation of 160 movements a day has been assessed.
- 5.3 Access is proposed from Pincet Lane via a priority T-junction in two potential locations. In terms of capacity and visibility, the junction is considered to be appropriate to serve the development site.
- 5.4 In conclusion, there are no highways or transport grounds for objecting to the planning application.

Classification Schemes

Scheme F Classification Scheme (Non-metric)

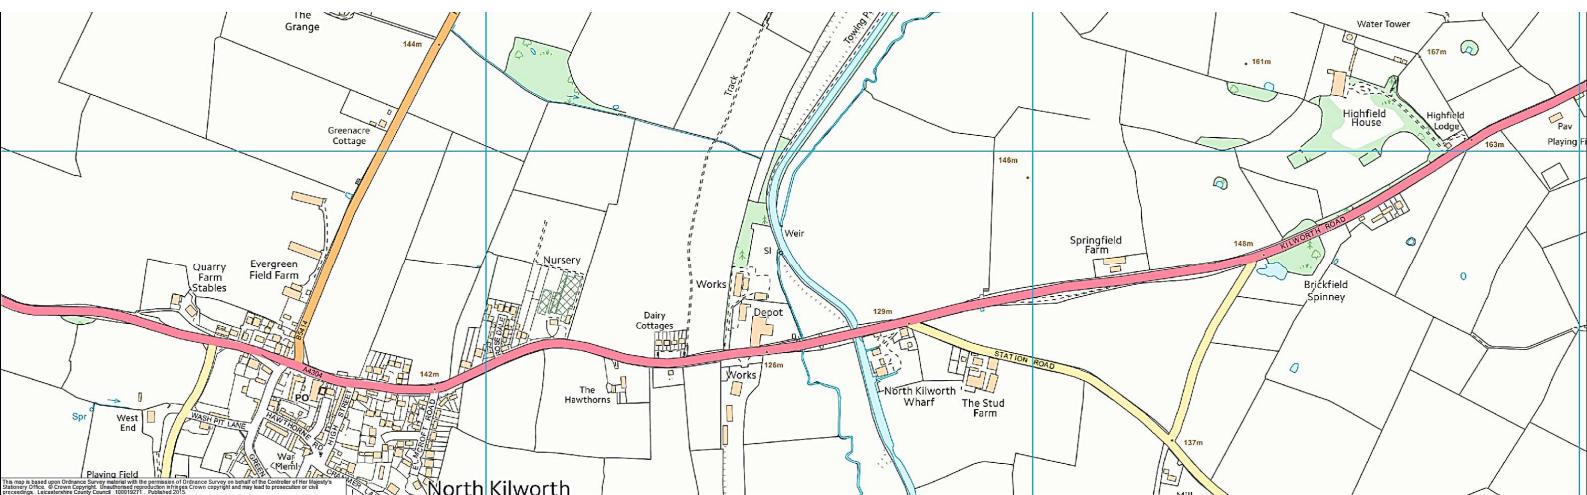

Scheme F is an attempt to implement the FHWA's visual classification scheme as an axle-based classification scheme. This is one of several interpretations.

Class	Vehicle Type	No. of Axles	Axle spacing in feet			
			Axle 1 to 2	Axle 2 to 3	Axle 3 to 4	Axle 4 to 5
1	motorcycle	2	<6.0			
2	passenger car	2	6.0 - 10.0			
	car + 1 axle trailer	3	<10.0	10.0 - 18.0		
	car + 2 axle trailer	4	<10.0		<3.5	
3	pickup	2	10.0 - 15.0			
	pickup + 1 axle trailer	3	10.0 - 15.0	10.0 - 18.0		
	pickup + 2 axle trailer	4	10.0 - 15.0		<3.5	
	pickup + 3 axle trailer	5	9.9 - 15.0			<3.5
4	Traditional bus/coach	2	>20.0			
	Traditional bus/coach	3	>19.0			
5	single unit truck/bus - dual rear axle	2	14.9 - 20.0			<3.5
6	3 axle truck	3		<18.0		
7	4 axle truck	4				
8	2S1	3		>18.0		
	2S2	4		>5.0	>3.5	
	3S1	4		<5.0	>10.0	
9	3S2	5		<6.1		3.5 - 8.0
	5 axle combination	5				
10	6 axle combination	6			3.5 - 5.0	
	3S3	6				
11	2S1-2	5		>6.0		
12	3S1-2	6				
13	truck	7 or more
