Section 1 - Purpose of Plan

The WSOA is a dynamic document that will remain under constant review and therefore change over time as work is progressed. Progress against actions within each priority will be rated as follows:

Progress (BRAG(P))

Completed (B)	Good progress (G)	Progress with minor delays (A)	Little or no progress (R)	Yet to start (P)
------------------	----------------------	-----------------------------------	------------------------------	---------------------

The RAG rating above will be used as part of the monitoring process going forward which will be undertaken by the Leicestershire SEND and Inclusion Board. At the start of the improvement journey some significant issues required immediate action and have either been completed or are underway at the point of submission of this WSOA. Milestone completion dates will be included in the WSOA as the plan is monitored, which will act as a critical measure over the next 18 months.

Wherever quantifiable, percentages of improvement will be recorded within the progress columns along with milestone measures and a narrative to explain the journey towards completing the actions.

Impact measures will also be quantified where appropriate, for example, percentage of parental satisfaction as the actions are delivered and become embedded.

The summary table below contains three columns demonstrating progress:

- completed – status of the progress of the action at the end of each cycle
- impact – how has the action impacted on the experience of our service users
- sustained – is the action continuing to be worked upon

The column for **completed** uses the rating of **BRAG(P)**

The column for **impact** uses the rating of **RAG(P)**

The column for **sustained** uses a star rating:

Appendix 2 – High Needs Funding Development Plan

This plan outlines actions and monitors progress towards ensuring children and young people with Special Educational Needs and/or Disabilities (SEND) receive the right support, at the right time, and in the right setting. This is a key focus of the County Council's High Needs Block (HNB) Programme. Progress is monitored monthly through the High Needs Block Programme Board with RAG rated highlight reports including risks, issues and mitigations for each of the workstreams outlined below.

The programme of work was established in response to:

- X Capital investment of £30m by the council to create more SEND places locally in response to increased demand
 - X Significant increases in requests to the council for additional support for children and young people with SEND. This is expected to continue for at least the next five years
 - X The need to improve the quality of SEND support and Education, Health and Care Plans (EHCPs) so that children and young people with SEND experience better outcomes.
 - X Financial pressures due to increased SEND demand and increased costs.
 - X The programme will need to carefully consider how support can be delivered to ensure the resources available are being used to meet the needs of as many children and young people as possible. To achieve its vision, the programme of work is made up of eight workstreams each with its own purpose and objectives:
- X Sufficiency & Buildings to provide additional places for children and young people with SEND now and in the future. This includes developing new special schools and resource units within mainstream provision.
 - X Inclusion to provide support to mainstream schools which will enable children and young people to access learning within their local area and in mainstream schools where possible.
 - X SEND Commissioning & Strategy to provide a strategic framework that results in better joint planning and commissioning across education, health and social care that enables children to thrive throughout their education and into adulthood.
 - X Right Place at the Right Time to ensure that all children with SEND are in the most appropriate setting for them, within the resources available.
 - X SEND Whole System Review to develop more efficient SEND processes to improve the experiences for children and young people, and their families.
 - X Contracts & Commissioning to ensure that the SEND placements and services the council buys meet the needs of children and young people with SEND and provide value for money.
 - X Quality Assurance Framework to develop and implement a framework which ensures greater consistency and improved quality in EHCPs and SEND support. It will also ensure staff working with children and young people with SEND work within a culture which acts on lessons learnt and recognises good practice.
 - X Whole School Reviews to work with settings to identify whether the funding they receive to support children and young people with SEND could be used more efficiently whilst enabling creative and innovative ways of working.
