Whilst every effort has been made to ensure the accuracy of the information contained within this report, Leicestershire County Council cannot be held responsible for any errors or omission relating to the data contained within the report.

What have we learnt from the newly released Covid-19 data?

A series of publicly available dashboards examining Covid-19 cases, deaths involving Covid-19 and a district summary are available at the below links. A summary narrative to support the data in these dashboards then follows.

- [Deaths involving Covid-19](#)
- [Covid-19 Summary at District Level](#)
- [PHE Weekly Covid-19 Cases](#)

1. Five deaths¹ involving Covid-19 were recorded in Leicestershire in the last week

- As of week 48 2021 (up to 3rd December), there has been a total of 1,730 deaths in Leicestershire. The weekly count of deaths has remained constant with five deaths in week 47 of 2021 and five deaths in week 48 of 2021.
- Of all deaths involving Covid-19 in Leicestershire, 1,172 (67.7%) were in hospital and 421 (24.3%) were in a care home.
- In week 48 in Leicestershire, there were five deaths in a hospital.

¹ Death counts are based on death occurrences. The death is counted as involving Covid-19 if Covid-19 was mentioned on the death certificate. Please note, Covid-19 may not have been confirmed by a test. Source: [Office for National Statistics](#) (2021)

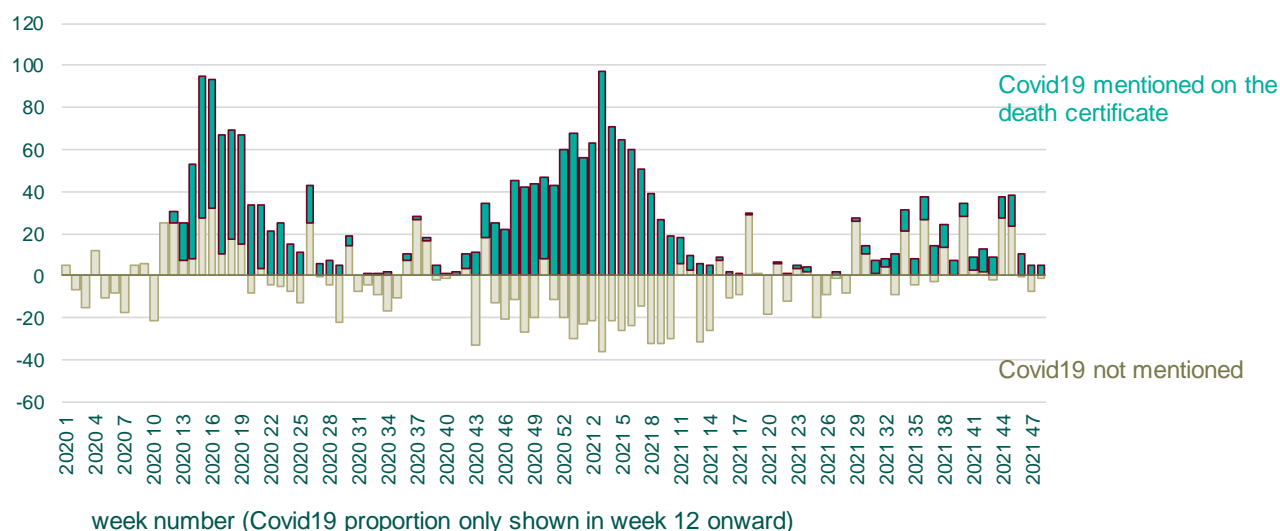

Deaths (numbers) by local authority and place of death, for deaths that occurred up to 3rd December but were registered up to 11th December.

3. Two areas in Blaby, one area in Charnwood and one area in Oadby and Wigston has a significantly higher percentage of deaths involving Covid-19 than the national percentage

Note: There is no further update available for this data.

- The map below examines the statistical significance compared to England, of the percentage of deaths involving Covid-19 by Middle Layer Super Output Area (MSOA) in Leicestershire and Rutland. These deaths occurred between 1st March 2020 and 30th April 2021.
- Stoney Stanton, Sapcote & Sharnton in Blaby recorded 33 deaths involving Covid-19 in this time period, this represented 27.3% of all deaths. Kirby Muxloe and Thurlaston in Blaby recorded 31 deaths involving Covid-19 in this time period, this represented 26.7% of all deaths. Birstall Wanlip & Riverside in Charnwood recorded 30 deaths involving Covid-19 in this time period, this represented 24.6% of all deaths. Oadby North & East in Oadby and Wigston recorded 38 deaths involving Covid-19 which represented 23.6% of all deaths.
- Nationally, deaths involving Covid-19 made up under a fifth (17.1%) of all deaths.
- 12 MSOAs in Leicestershire and Rutland have a significantly lower percentage of deaths involving Covid-19 compared to England. These are:
 - Market Bosworth, Barlestone & Sheepy Magna in Hinckley and Bosworth (11, 10.0%)
 - Bottesford, Harby & Croxton Kerrial in Melton (12, 9.9%)
 - Loughborough – Outwoods in Charnwood (10, 9.6%)
 - Market Harborough Central in Harborough (10, 8.7%)
 - Broughton Astley in Harborough (8, 8.6%)
 - Thurgate, Woodhouse & Bradgate in Charnwood (8, 8.3%)
 - Market Overton, Cottesmore & Empingham in Rutland (6, 8.3%)
 - Countesthorpe & Kilby in Blaby (6, 8.3%)
 - Thringstone & Swannington in North West Leicestershire (7, 7.8%)
 - Hinckley Clarendon Park in Hinckley and Bosworth (5, 7.7%)
 - Melton Mowbray South in Melton (7, 7.2%)
 - Fleckney, Kilworth & Foxton in Harborough (7, 5.7%)
- Further data examining deaths involving Covid-19 by local area is available in the dashboard available at [this link](#).

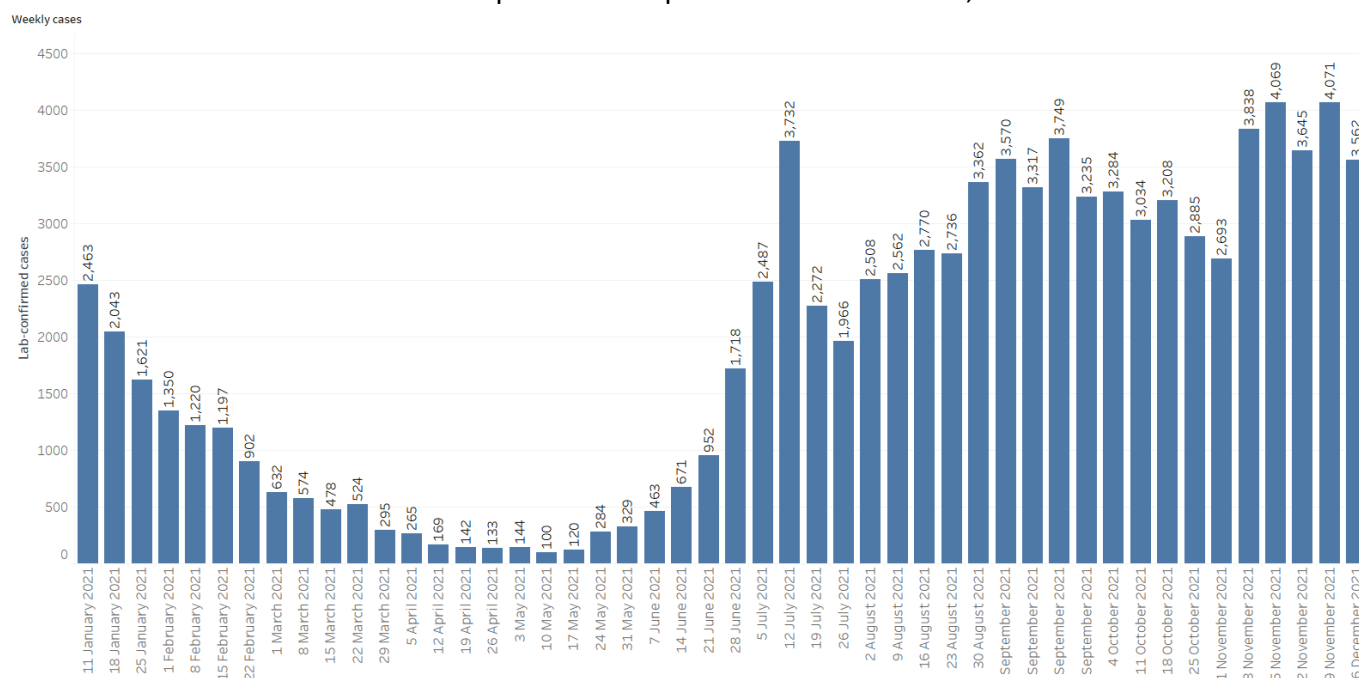

Statistical Significance compared to England of the deaths involving Covid-19 by Middle Layer Super Output Area, Leicestershire and Rutland, deaths occurring between 1st March 2020 and 30th April 2021.

4. Weekly counts of cases have decreased in the past week in Leicestershire

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

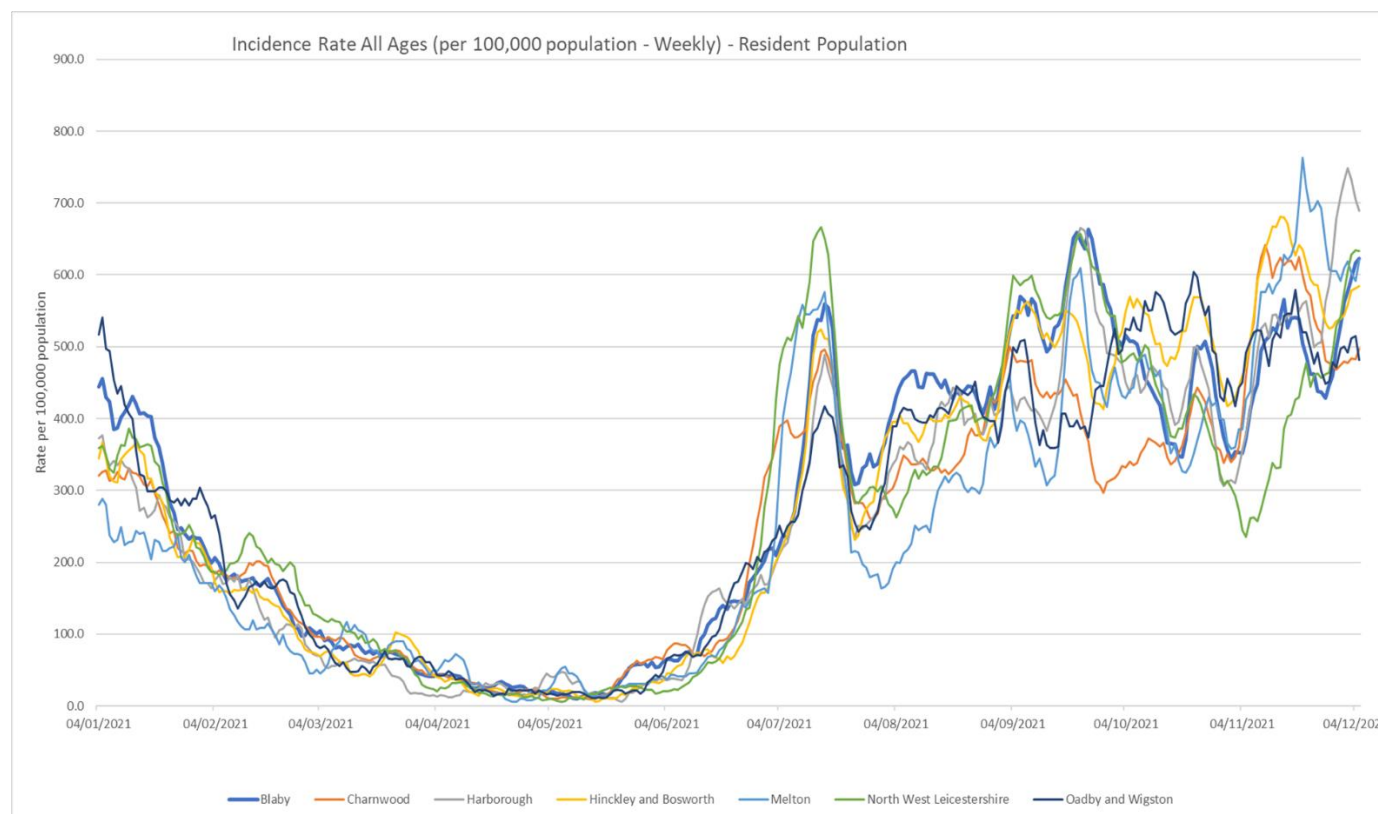

- As of 12th December, Leicestershire has recorded a total of 122,012 lab-confirmed cases of Covid-19. This data relates to pillar 1 and 2 cases.
- From January 11th to the beginning of May, cases had been decreasing. From then to mid July the cases increased before decreasing in w/c 19th July. Since then, the weekly counts of cases have shown an increasing trend, with the exception of the weeks between the 20th September and the 1st November where the weekly counts of cases showed a decreasing trend and the last 5 weeks where the weekly counts of cases fluctuated.
- The latest weekly data shows 3,562 cases have been confirmed in Leicestershire in the last week. This count has decreased compared to the previous week where 4,071 cases were confirmed.

5. Harborough has the highest weekly incidence rate of Covid-19 cases for people of all ages in the county

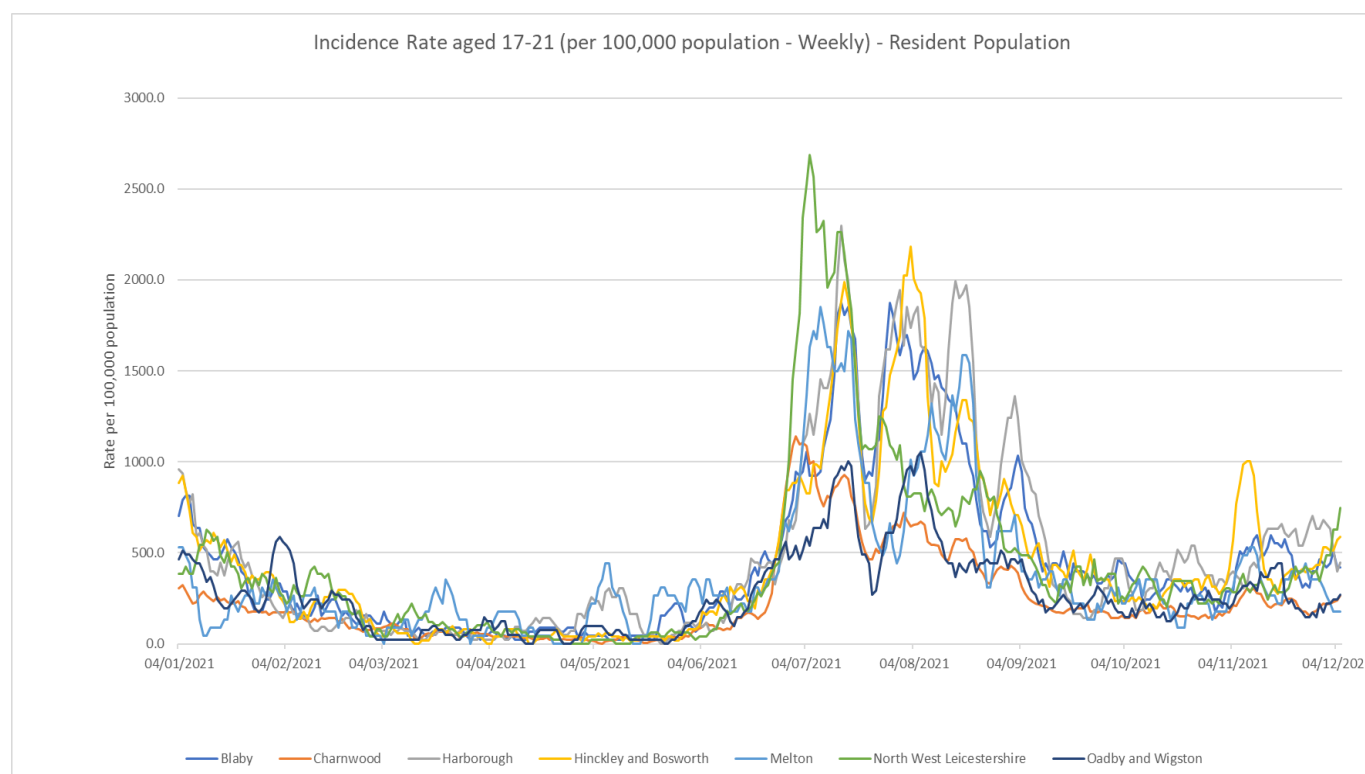

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

- The incidence rate for Covid-19 cases in Leicestershire had shown a declining trend between the beginning of January and the final week of April. The incidence rate in Leicestershire then fluctuated between the final week of April and the middle of May. The incidence rate then increased until the 16th of July. Since then, the incidence rate has fluctuated. The incidence rate in Leicestershire (582.5 per 100,000 population) is higher than the national rate (510.4 per 100,000 population) as of 5th December 2021.
- The latest weekly incidence rates of Covid-19 cases for people of all ages (as of 5th December) show that the following area rates in Leicestershire are higher than the national rate (510.4 per 100,000 population):
 - Harborough; 689.8 per 100,000 (659 cases)
 - North West Leicestershire; 633.5 per 100,000 (664 cases)
 - Blaby; 622.9 per 100,000 (635 cases)
 - Melton; 620.7 per 100,000 (319 cases)
 - Hinckley & Bosworth; 584.2 per 100,000 (664 cases)
- The following area rates in Leicestershire are lower than the national rate (510.4 per 100,000 population):
 - Charnwood; 497.3 per 100,000 (937 cases)
 - Oadby & Wigston; 481.6 per 100,000 (276 cases)
- Rutland has a higher incidence rate of Covid-19 cases (516.4 per 100,000) than England for people of all ages. This equates to 209 cases.

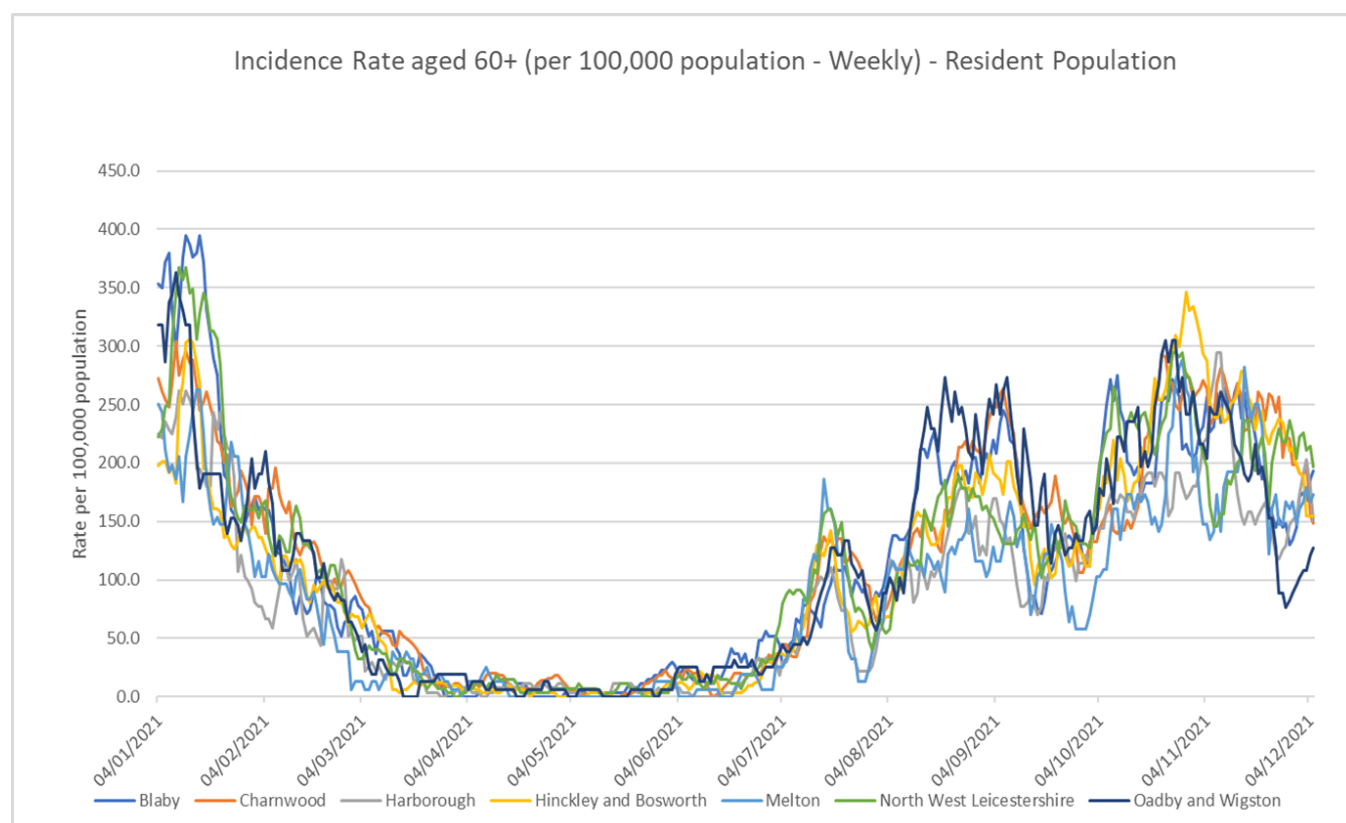

6. North West Leicestershire has the highest weekly incidence rate of Covid-19 cases for people aged 17-21 in the county

- Between the 5th of January and the 5th of April the weekly incidence rate of Covid-19 for people aged 17-21 had been declining. From the 5th of April to the end of May the rate fluctuated. Since then the weekly incidence rate of Covid-19 for people aged 17-21 in Leicestershire has shown an increasing trend, with the exception of the period between the 14th of July and the 23rd of July and the 5th of August to the 5th of October where the incidence rate declined, and the 5th October to the 31st of October and the last four weeks where the rate fluctuated.
- As of the 5th of December, the rate for Leicestershire (389.2 per 100,000 population) is lower than the national rate for people aged 17-21 (425.7 per 100,000 population).
- The latest weekly incidence rates of Covid-19 cases for people aged 17-21 (as of 5th December) show that the following area rates in Leicestershire are higher than the national rate (425.7 per 100,000 population):
 - North West Leicestershire; 747.5 per 100,000 (37 cases)
 - Hinckley & Bosworth; 590.1 per 100,000 (30 cases)
 - Harborough; 445.5 per 100,000 (19 cases)
- The following area rates in Leicestershire are lower than the national rate (425.7 per 100,000 population):
 - Blaby; 418.5 per 100,000 (19 cases)
 - Oadby & Wigston; 269.2 per 100,000 (11 cases)
 - Charnwood; 263.5 per 100,000 (46 cases)
 - Melton; 176.4 per 100,000 (4 cases)
- Rutland has a higher incidence rate of Covid-19 cases (647.8 per 100,000) than England for people aged 17-21. This equates to 11 cases.

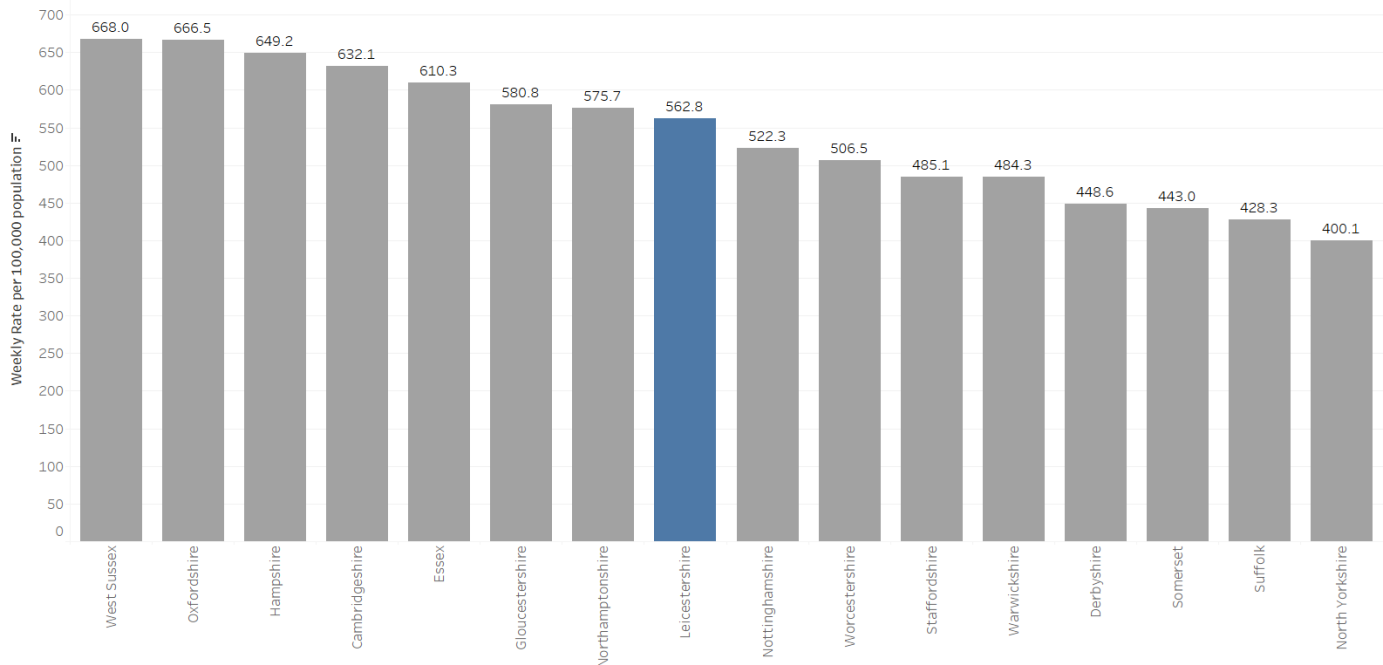

7. North West Leicestershire has the highest weekly incidence rate of Covid-19 cases for people aged 60+ in the county

- The incidence rate for Covid-19 cases in people aged 60+ in Leicestershire showed a declining trend between the beginning of January and the middle of May, with the exception of the first two weeks of April where the rate showed an increasing trend. From the middle of May to the first week of June the rate showed an increasing trend, before fluctuating for two weeks. Since then the rate has shown an increasing trend, with the exception of the period between the 18th of July and the 30th of July and the 5th of September and the 3rd of October where the incidence rate fluctuated and since the 26th of October where the rate has shown a decreasing trend. The rate for Leicestershire (163.5 per 100,000 population) is higher than the national rate (131.0 per 100,000 population) as of 5th December.
- The latest weekly incidence rates of Covid-19 cases for people aged 60+ (as of 5th December) show that the following area rates in Leicestershire are higher than the national rate (131.0 per 100,000 population):
 - North West Leicestershire; 196.5 per 100,000 (54 cases)
 - Blaby; 193.5 per 100,000 (52 cases)
 - Melton; 173.2 per 100,000 (27 cases)
 - Hinckley & Bosworth; 154.6 per 100,000 (50 cases)
 - Harborough; 151.0 per 100,000 (41 cases)
 - Charnwood; 148.6 per 100,000 (66 cases)
- The following area rates in Leicestershire are lower than the national rate (131.0 per 100,000 population):
 - Oadby & Wigston; 127.2 per 100,000 (20 cases)
- Rutland has a higher incidence rate of Covid-19 cases (176.6 per 100,000) than England for people aged 60+. This equates to 23 cases.

8. Leicestershire has seen an increase in the weekly rate of Covid-19 cases

- There has been an increase in the weekly rate of Covid-19 cases in Leicestershire from 461.5 (per 100,000 population) in week 47 of 2021 to 562.8 (per 100,000 population) in week 48 of 2021.
- As of week 48 (29th November to 5th December 2021), Leicestershire is ranked 39th (highest) out of 149 upper tier local authorities and ranked 8th (highest) out of its CIPFA similar areas.

9. The MSOA with the highest count of Covid-19 cases in the last week was Market Harborough South & Little Bowden in Harborough

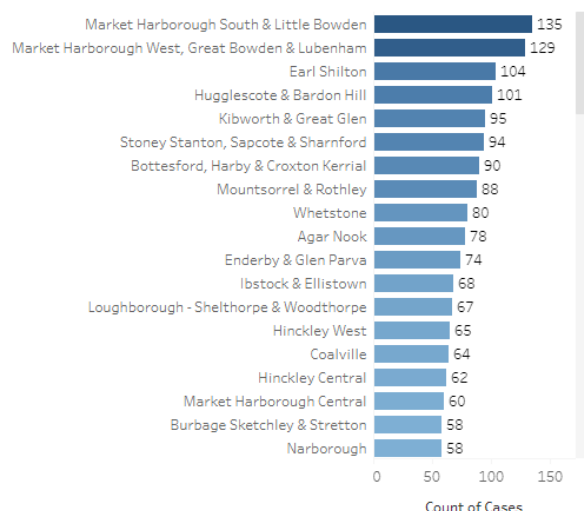

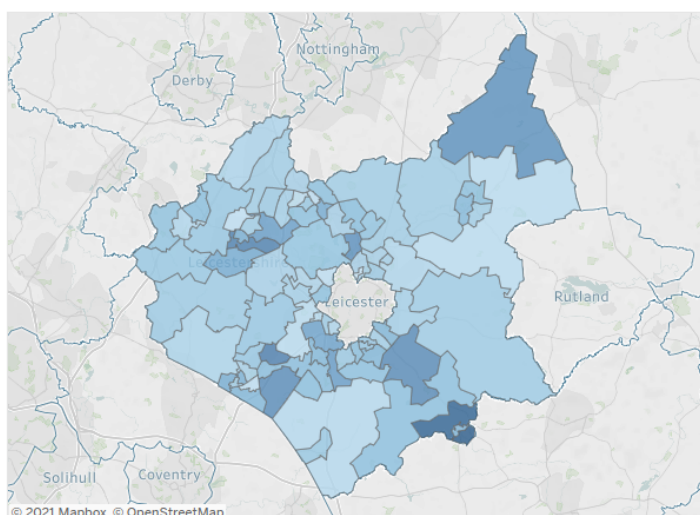

- Up to 7th December (week 48 of 2021), the Middle Super Output Area (MSOA) with the highest count of confirmed cases of Covid-19 was Market Harborough South & Little Bowden with 135 reported cases. This was followed by:
 - Market Harborough West, Great Bowden & Lubenham (129)
 - Earl Shilton (104)
 - Hugglescote & Bardon Hill (101)
 - Kibworth & Great Glen (95)
 - Stoney Stanton, Sapcote & Sharnford (94)
 - Bottesford, Harby & Croxton Kerrial (90)
 - Mountsorrel & Rothley (88)
 - Whetstone (80)
 - Agar Nook (78)
 - Enderby & Glen Parva (74)
 - Ibstock & Ellistown (68)
 - Loughborough – Shelthorpe & Woodthorpe (67)
 - Hinckley West (65)
- All other areas recorded less than 65 cases in the last week.
- Areas that recorded between zero and two cases in the last week have been suppressed due to data disclosure and are represented as white in the map below.

Weekly Counts of Lab-confirmed Covid-19 cases by Middle Layer Super Output Area, Leicester, Leicestershire and Rutland

Date as number: 07/12/2021
 Local Authority: Leicestershire

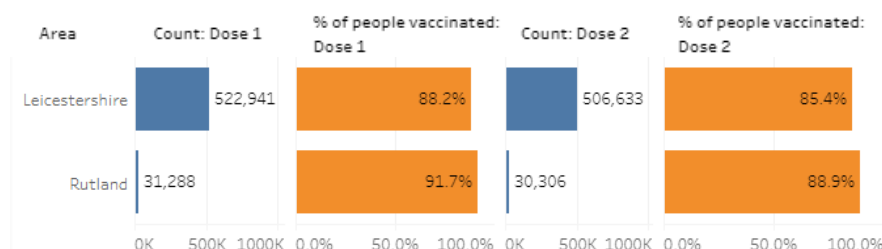

COVID-19 Cases: 0 to 135

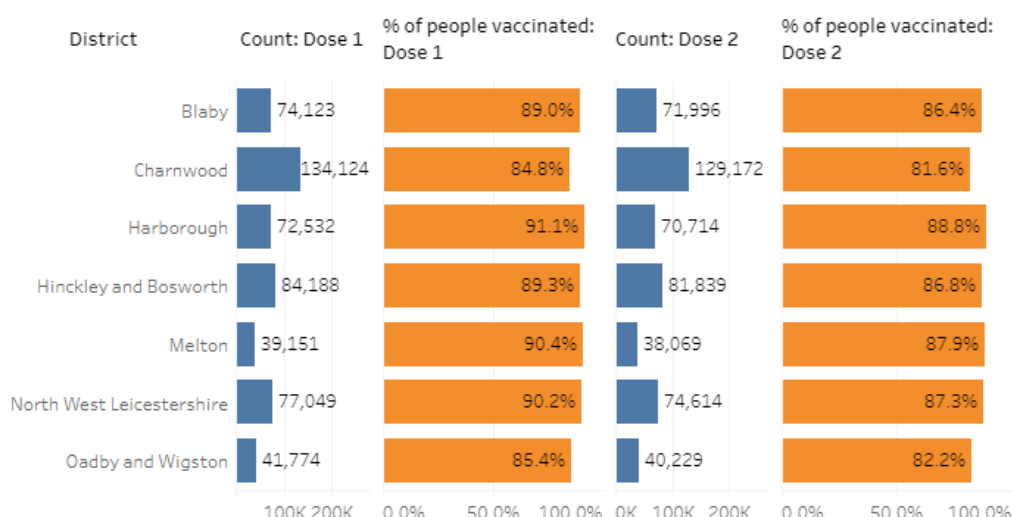

10. Covid-19 Vaccination Uptake Summary

The following tables show a summary of Covid-19 vaccination uptake by Local Authority and District with a breakdown for the over 18 age cohort.

- Up to 5th December 2021, the Covid-19 dose 1 vaccination uptake for the over 18 age cohort was 88.2% in Leicestershire and 91.7% in Rutland. The Covid-19 dose 2 vaccination uptake for the over 18 age cohort in Leicestershire was 85.4%, whilst the dose 2 uptake in Rutland was 88.9%.

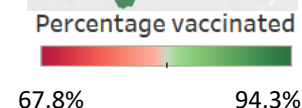

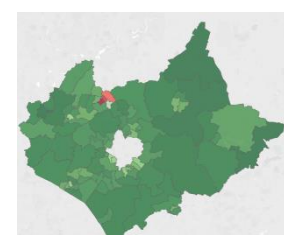

- Most districts (apart from Charnwood) have a Covid-19 dose 1 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 91.1% and Charnwood having the lowest with 84.8%. With the exception of Charnwood and Oadby and Wigston, all districts have a Covid-19 dose 2 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 88.8% and Charnwood having the lowest with 81.6%.

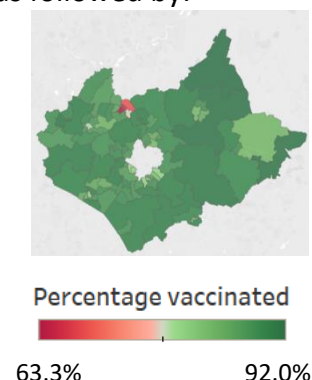

The following map shows a summary of Covid-19 vaccination uptake (dose 1) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 5th December 2021, Ashby de la Zouch South was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 94.3%. This was followed by:
 - Ketton, Ryhall & Luffenham; 94.0%
 - Bottesford, Harby & Croxton Kerrial; 93.3%
 - Ashby de la Zouch North; 93.3%
 - Waltham, Wymondham & Great Dalby; 93.3%
- Loughborough - University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 67.8%. This was followed by:
 - Loughborough Storer & Queen's Park; 69.0%
 - Loughborough Lemyngton & Hastings; 72.3%
 - Loughborough – Shelthorpe & Woodthorpe; 79.5%
 - Coalville; 82.1%

The following map shows a summary of Covid-19 vaccination uptake (dose 2) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

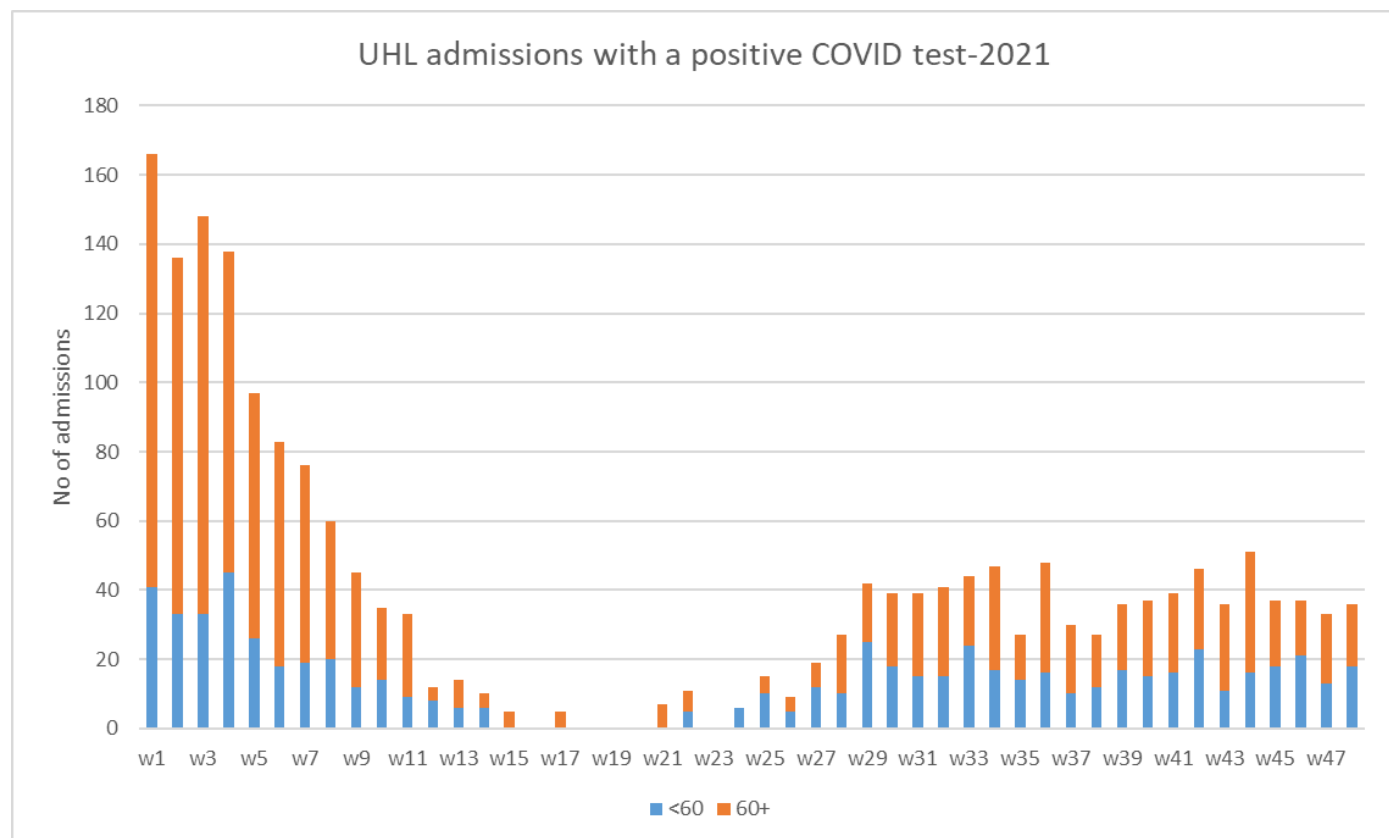

- Up to 5th December 2021, Ketton, Ryhall & Luffenham was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 92.0%. This was followed by:
 - Ashby de la Zouch South; 91.8%
 - Bottesford, Harby & Croxton Kerrial; 91.3%
 - Waltham, Wymondham & Great Dalby; 91.3%
 - Tilton, Billesdon & Great Easton; 90.8%
 - Ashby de la Zouch North; 90.8%
- Loughborough – University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 63.3%. This was followed by:
 - Loughborough Storer & Queen's Park; 64.1%
 - Loughborough Lemyngton & Hastings; 66.9%
 - Loughborough – Shelthorpe & Woodthorpe; 75.9%
 - Coalville; 78.0%

11. Admissions with Covid-19 to UHL

Note: There is no update available for this data this week.

- Up to 4th December, 3,949 admissions with Covid-19 have been made to UHL by Leicestershire residents since the start of the pandemic.
- Patients aged 60+ account for just under three-quarters (71%) of all admissions from Leicestershire residents.
- In week 48 (28th November 2021 to 4th December 2021), there were 36 admissions with Covid-19 made to UHL by Leicestershire residents; 18 (50%) of these admissions were patients aged 60+.

Note: Counts less than three have been suppressed.

12. District Level Summary

- **Oadby & Wigston** continues to have the highest rate of Covid-19 cases and deaths in the county. The rate of cumulative cases is significantly higher in comparison to the England average.
- From the beginning of September to the 9th November, the weekly counts of cases had shown an increasing trend in Oadby and Wigston. Between the w/c 9th November and the w/c 28th December, the weekly counts of cases fluctuated. The weekly counts of cases then showed a declining trend until the third week of May. Between the third week of May and the 12th of July the weekly counts showed an increasing trend. Since then the weekly counts of cases have fluctuated in Oadby and Wigston.
- The weekly counts of cases have decreased from 282 in w/c 29th November to 240 in w/c 6th December.
- The latest weekly count of deaths involving Covid-19 shows that no deaths occurred in Oadby & Wigston in week 48 of 2021.
- **North West Leicestershire** has the third lowest rate of Covid-19 cases and the second highest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From early September to the 9th November an increasing trend in the weekly counts of cases had been witnessed in North West Leicestershire. Following this, the weekly counts of cases decreased each week for four weeks. The weekly counts of cases then increased for three weeks, before showing a declining trend throughout January, February, March and April. Throughout May the count fluctuated, since then the count increased week on week until the w/c 12th July. The count of cases then decreased for 3 weeks before showing an increasing trend between the 2nd of August and the 20th September. Since then, the weekly counts of cases have decreased week on week with the exception of the last five weeks where an increasing trend was witnessed.
- The latest weekly counts of cases have decreased from 634 in w/c 29th November to 535 in w/c 6th December.
- The latest weekly count of deaths shows one death involving Covid-19 occurred in North West Leicestershire in week 48 of 2021; this death occurred in a hospital.
- **Blaby** has the second highest rate of Covid-19 cases in the county and the third highest rate of deaths. The rate of cumulative cases is significantly higher compared to the England average.
- From mid-September, the weekly counts of cases in Blaby had shown an increasing trend, with a peak around the 9th of November. From then, the weekly counts of cases have fluctuated, with the exception of the last three weeks of December and the first week of January where the weekly counts of cases increased each week. From early January to mid May, the weekly counts of cases had shown a declining trend. Between mid May and the 20th of September, the weekly counts of cases showed increasing trend. Since then, the weekly counts of cases have fluctuated in Blaby.
- The latest weekly counts of cases have decreased from 588 in w/c 29th November to 521 in w/c 6th December.
- The latest weeks data shows no deaths involving Covid-19 were recorded in Blaby in week 48 of 2021.
- **Melton** has the lowest rate of Covid-19 cases and the fourth highest rate of deaths in the county. The rate of cumulative cases is significantly lower than the England average.
- From mid-September, the weekly counts of cases had been increasing week on week in Melton, showing a peak around the 9th of November. A second peak was witnessed around 28th of

December. Through January to the end of March weekly counts of cases had shown a declining trend, since then the weekly counts of cases in Melton had fluctuated until mid May. From mid May until w/c 12th July, the weekly count of cases increased week on week. The case count then decreased for 2 weeks before fluctuating over the past 19 weeks.

- The latest weekly count of cases have decreased from 318 in w/c 29th November to 238 in w/c 6th December.
- The latest weekly count of deaths involving Covid-19 shows that no deaths occurred in Melton in week 48 of 2021.
- **Hinckley & Bosworth** has the fourth highest rate of Covid-19 cases and third lowest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From mid-September to the 9th of November, the weekly counts of cases had increased each week in Hinckley and Bosworth. The weekly counts of cases had fluctuated from November 9th to January 11th. From then until mid March the weekly counts of cases decreased, before fluctuating until late May. Between the end of May and the 12th July there was an increasing trend in the weekly counts of cases. Since then the count of cases has fluctuated, with the exception of the last four weeks where Hinckley & Bosworth has witnessed a decrease in the weekly count of cases.
- The latest weekly count of cases have decreased from 635 in w/c 29th November to 585 in w/c 6th December.
- The latest weeks data shows two deaths involving Covid-19 were recorded in Hinckley & Bosworth in week 48 of 2021; both deaths occurred in a hospital.
- **Charnwood** has the third highest rate of Covid-19 cases and the second lowest rate of deaths in the county. The rate of cumulative cases is significantly higher in comparison to the England average.
- The weekly counts of cases in Charnwood had shown an increasing trend from early September to mid-October, showing a peak around the 19th of October. Between the 19th of October and the 23rd November the weekly counts of cases showed a declining trend. Following this, the weekly counts of cases increased each week in Charnwood, peaking around December 28th. The rate then showed a declining trend until the 3rd of May, before showing an increasing trend for 10 weeks. Between the 19th of July and the 8th November the weekly count of cases had fluctuated. Since then, the weekly count of cases has shown a decreasing trend in Charnwood.
- The latest weekly counts of cases have increased from 899 in w/c 29th November to 958 in w/c 6th December.
- The latest weeks data shows two deaths involving Covid-19 were recorded in Charnwood in week 48 of 2021; both deaths occurred in a hospital.
- **Harborough** has the second lowest rate of Covid-19 cases and the lowest rate of deaths in the county. The rate of cumulative cases is not significantly different to the England average.
- From the beginning of September to the 9th November, the weekly counts of cases had shown an increasing trend in Harborough. Between the w/c 9th November and the w/c 7th December the weekly counts of cases showed a declining trend. Between then and December 28th, the weekly counts of cases had increased each week before showing a declining trend until the end of March. Throughout April and May the rate had fluctuated, before showing an increasing trend over the next seven weeks. Between the 19th of July and the 20th of September the weekly counts of cases showed an increasing trend. Since then, the weekly counts of cases have fluctuated.
- The latest weekly counts of cases have decreased from 715 in w/c 29th November to 485 in w/c 6th December.

- The latest weeks data on death occurrences shows that no deaths involving Covid-19 were recorded in Harborough in week 48 of 2021.
