Whilst every effort has been made to ensure the accuracy of the information contained within this report, Leicestershire County Council cannot be held responsible for any errors or omission relating to the data contained within the report.

What have we learnt from the newly released Covid-19 data?

A series of publicly available dashboards examining Covid-19 cases, deaths involving Covid-19 and a district summary are available at the below links. A summary narrative to support the data in these dashboards then follows.

- [Deaths involving Covid-19](#)
- [Covid-19 Summary at District Level](#)
- [PHE Weekly Covid-19 Cases](#)

1. Eight deaths¹ involving Covid-19 were recorded in Leicestershire in the last week

- As of week 46 2021 (up to 19th November), there has been a total of 1,718 deaths in Leicestershire. The weekly count of deaths has decreased from 15 deaths in week 45 of 2021 to 8 deaths in week 46 of 2021.
- Of all deaths involving Covid-19 in Leicestershire, 1,162 (67.6%) were in hospital and 419 (24.4%) were in a care home.
- In week 46 in Leicestershire, there were 6 deaths in a hospital and two deaths in an “other” setting.

¹ Death counts are based on death occurrences. The death is counted as involving Covid-19 if Covid-19 was mentioned on the death certificate. Please note, Covid-19 may not have been confirmed by a test. Source: [Office for National Statistics](#) (2021)

Deaths (numbers) by local authority and place of death, for deaths that occurred up to 19th November but were registered up to 27th November.

3. Two areas in Blaby, one area in Charnwood and one area in Oadby and Wigston has a significantly higher percentage of deaths involving Covid-19 than the national percentage

Note: There is no further update available for this data.

- The map below examines the statistical significance compared to England, of the percentage of deaths involving Covid-19 by Middle Layer Super Output Area (MSOA) in Leicestershire and Rutland. These deaths occurred between 1st March 2020 and 30th April 2021.
- Stoney Stanton, Sapcote & Sharnton in Blaby recorded 33 deaths involving Covid-19 in this time period, this represented 27.3% of all deaths. Kirby Muxloe and Thurlaston in Blaby recorded 31 deaths involving Covid-19 in this time period, this represented 26.7% of all deaths. Birstall Wanlip & Riverside in Charnwood recorded 30 deaths involving Covid-19 in this time period, this represented 24.6% of all deaths. Oadby North & East in Oadby and Wigston recorded 38 deaths involving Covid-19 which represented 23.6% of all deaths.
- Nationally, deaths involving Covid-19 made up under a fifth (17.1%) of all deaths.
- 12 MSOAs in Leicestershire and Rutland have a significantly lower percentage of deaths involving Covid-19 compared to England. These are:
 - Market Bosworth, Barlestone & Sheepy Magna in Hinckley and Bosworth (11, 10.0%)
 - Bottesford, Harby & Croxton Kerrial in Melton (12, 9.9%)
 - Loughborough – Outwoods in Charnwood (10, 9.6%)
 - Market Harborough Central in Harborough (10, 8.7%)
 - Broughton Astley in Harborough (8, 8.6%)
 - Thurgate, Woodhouse & Bradgate in Charnwood (8, 8.3%)
 - Market Overton, Cottesmore & Empingham in Rutland (6, 8.3%)
 - Countesthorpe & Kilby in Blaby (6, 8.3%)
 - Thringstone & Swannington in North West Leicestershire (7, 7.8%)
 - Hinckley Clarendon Park in Hinckley and Bosworth (5, 7.7%)
 - Melton Mowbray South in Melton (7, 7.2%)
 - Fleckney, Kilworth & Foxton in Harborough (7, 5.7%)
- Further data examining deaths involving Covid-19 by local area is available in the dashboard available at [this link](#).

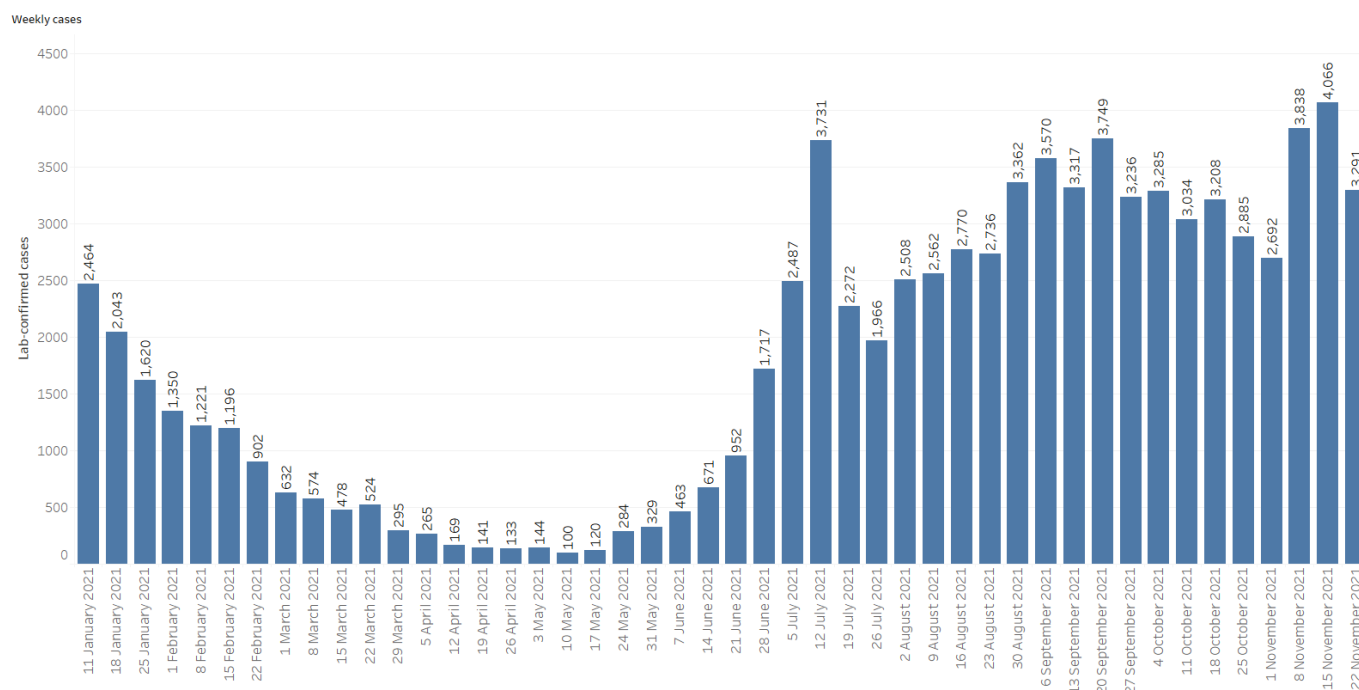

Statistical Significance compared to England of the deaths involving Covid-19 by Middle Layer Super Output Area, Leicestershire and Rutland, deaths occurring between 1st March 2020 and 30th April 2021.

4. Weekly counts of cases have decreased in the past week in Leicestershire

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

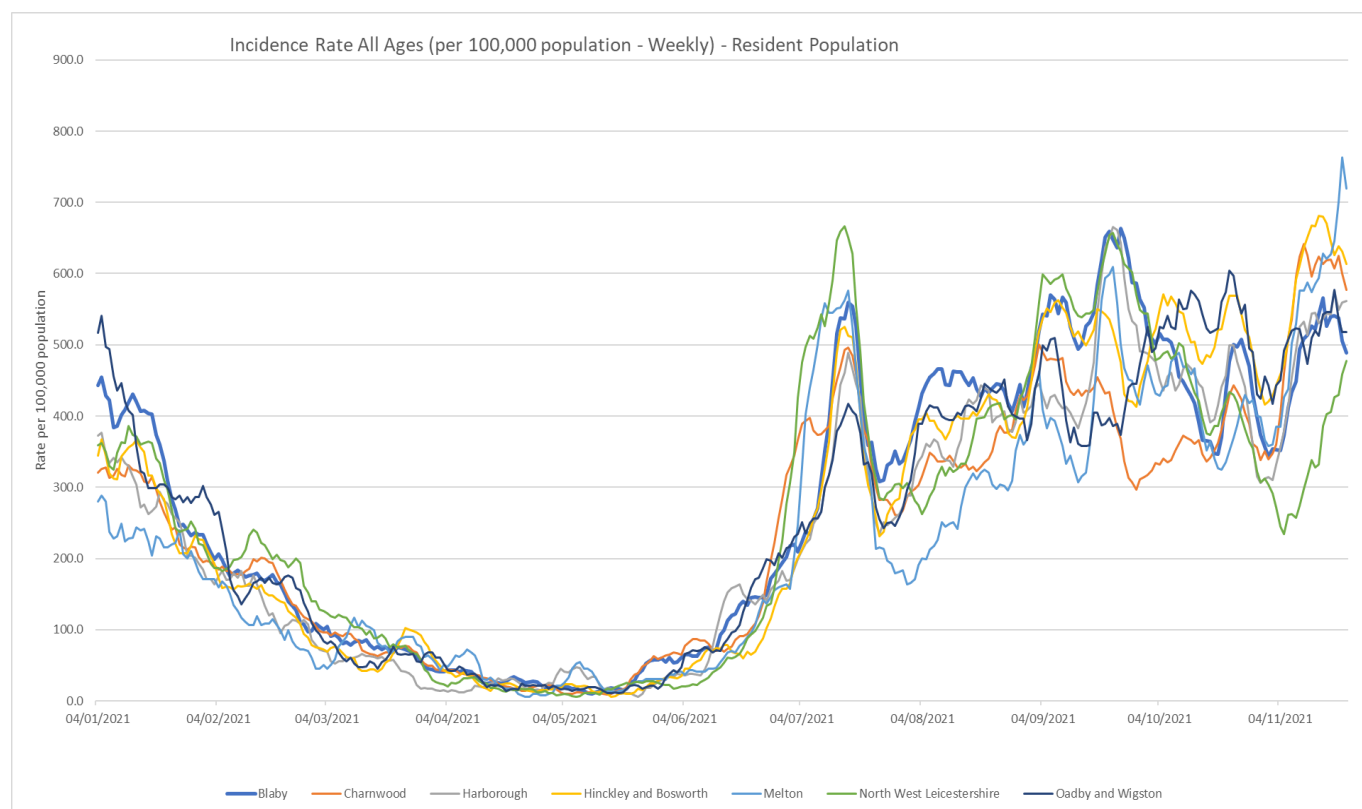

- As of 28th November, Leicestershire has recorded a total of 114,020 lab-confirmed cases of Covid-19. This data relates to pillar 1 and 2 cases.
- From January 11th to the beginning of May, cases had been decreasing. From then to mid July the cases increased before decreasing in w/c 19th July. Since then, the weekly counts of cases have shown an increasing trend, with the exception of the weeks between the 20th September and the 1st November where the weekly counts of cases showed a decreasing trend.
- The latest weekly data shows 3,291 cases have been confirmed in Leicestershire in the last week. This count has decreased compared to the previous week where 4,066 cases were confirmed.

5. Melton has the highest weekly incidence rate of Covid-19 cases for people of all ages in the county

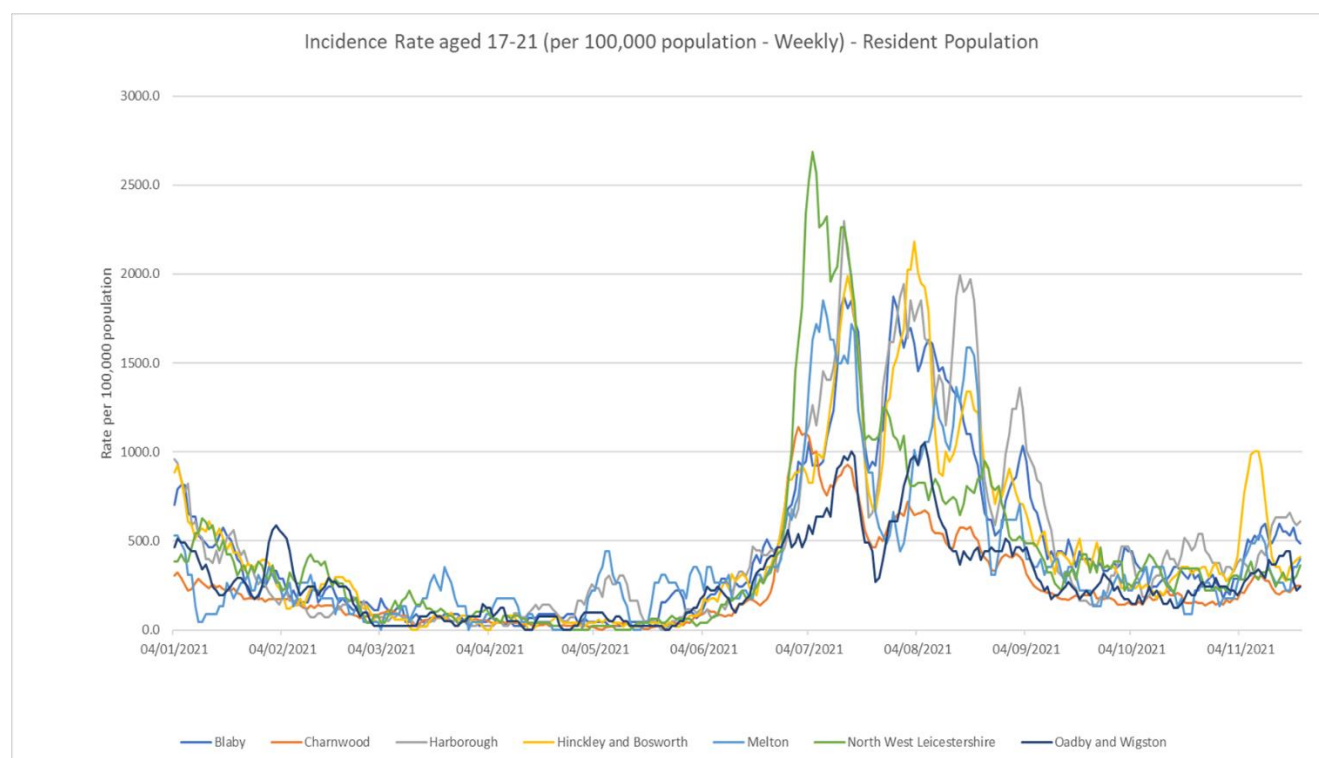

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

- The incidence rate for Covid-19 cases in Leicestershire had shown a declining trend between the beginning of January and the final week of April. The incidence rate in Leicestershire then fluctuated between the final week of April and the middle of May. The incidence rate then increased until the 16th of July. Between then and the end of October the incidence rate fluctuated before showing an increasing trend over the last three weeks. The incidence rate in Leicestershire (559.0 per 100,000 population) is higher than the national rate (440.1 per 100,000 population) as of 21st November 2021.
- The latest weekly incidence rates of Covid-19 cases for people of all ages (as of 21st November) show that the following area rates in Leicestershire are higher than the national rate (440.1 per 100,000 population):
 - Melton; 719.9 per 100,000 (370 cases)
 - Hinckley & Bosworth; 613.2 per 100,000 (697 cases)
 - Charnwood; 577.4 per 100,000 (1088 cases)
 - Harborough; 561.0 per 100,000 (536 cases)
 - Oadby & Wigston; 518.2 per 100,000 (297 cases)
 - Blaby; 488.5 per 100,000 (498 cases)
 - North West Leicestershire; 477.1 per 100,000 (500 cases)
- Rutland has a higher incidence rate of Covid-19 cases (657.2 per 100,000) than England for people of all ages. This equates to 266 cases.

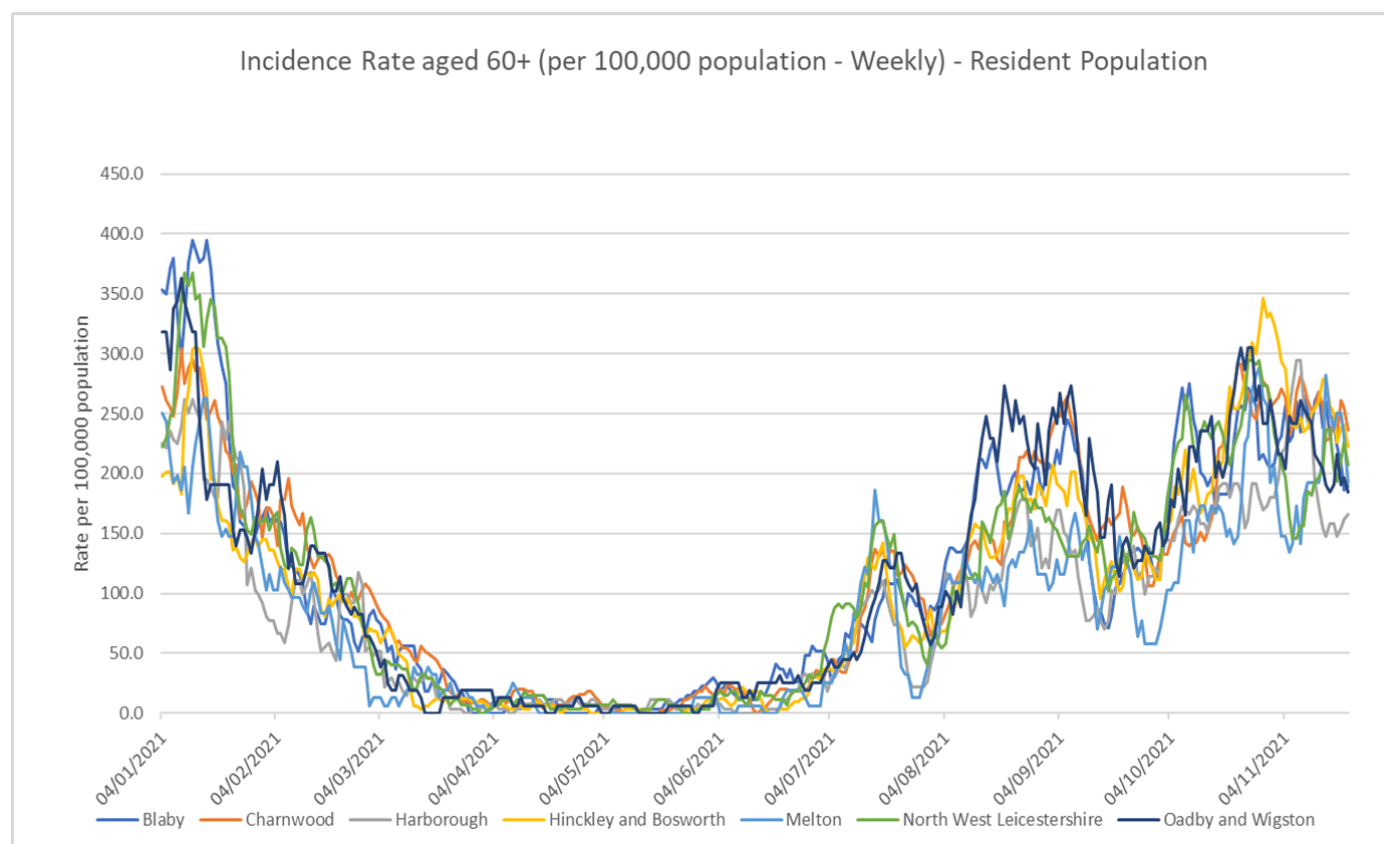

6. Harborough has the highest weekly incidence rate of Covid-19 cases for people aged 17-21 in the county

- Between the 5th of January and the 5th of April the weekly incidence rate of Covid-19 for people aged 17-21 had been declining. From the 5th of April to the end of May the rate fluctuated. Since then the weekly incidence rate of Covid-19 for people aged 17-21 in Leicestershire has shown an increasing trend, with the exception of the period between the 14th of July and the 23rd of July, the 5th of August to the 5th of October and the last four days where the incidence rate declined, the 5th October to the 31st of October and the last two weeks where the rate fluctuated.
- As of the 21st of November, the rate for Leicestershire (349.4 per 100,000 population) is higher than the national rate for people aged 17-21 (300.8 per 100,000 population).
- The latest weekly incidence rates of Covid-19 cases for people aged 17-21 (as of 21st November) show that the following area rates in Leicestershire are higher than the national rate (300.8 per 100,000 population):
 - Harborough; 609.6 per 100,000 (26 cases)
 - Blaby; 484.6 per 100,000 (22 cases)
 - Hinckley & Bosworth; 413.1 per 100,000 (21 cases)
 - Melton; 396.8 per 100,000 (9 cases)
 - North West Leicestershire; 363.6 per 100,000 (18 cases)
- The following area rates in Leicestershire are lower than the national rate (300.8 per 100,000 population):
 - Charnwood; 246.3 per 100,000 (43 cases)
 - Oadby & Wigston; 244.7 per 100,000 (10 cases)
- Rutland has a lower incidence rate of Covid-19 cases (294.5 per 100,000) than England for people aged 17-21. This equates to 5 cases.

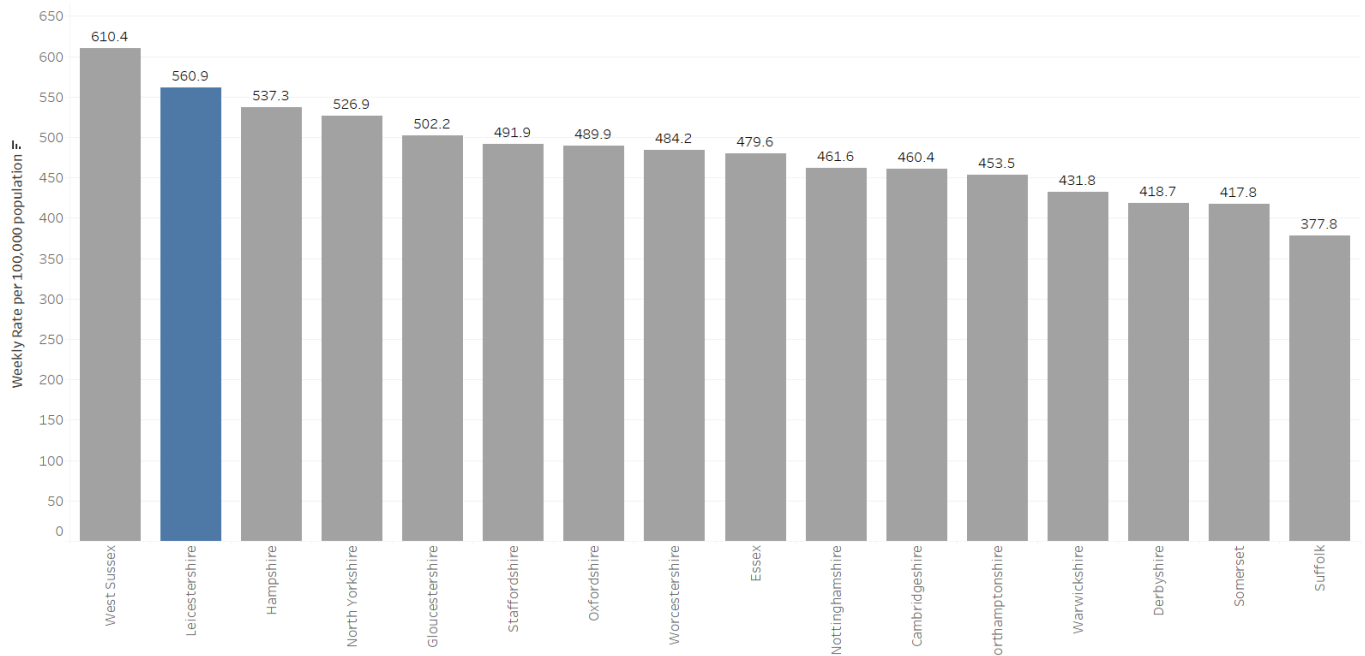

7. Charnwood has the highest weekly incidence rate of Covid-19 cases for people aged 60+ in the county

- The incidence rate for Covid-19 cases in people aged 60+ in Leicestershire showed a declining trend between the beginning of January and the middle of May, with the exception of the first two weeks of April where the rate showed an increasing trend. From the middle of May to the first week of June the rate showed an increasing trend, before fluctuating for two weeks. Since then the rate has shown an increasing trend, with the exception of the period between the 18th of July and the 30th of July and the 5th of September and the 3rd of October where the incidence rate fluctuated and since the 26th of October where the rate has shown a decreasing trend. The rate for Leicestershire (205.2 per 100,000 population) is higher than the national rate (147.8 per 100,000 population) as of 21st November.
- The latest weekly incidence rates of Covid-19 cases for people aged 60+ (as of 21st November) show that the following area rates in Leicestershire are higher than the national rate (147.8 per 100,000 population):
 - Charnwood; 236.5 per 100,000 (105 cases)
 - Hinckley & Bosworth; 222.6 per 100,000 (72 cases)
 - North West Leicestershire; 207.4 per 100,000 (57 cases)
 - Melton; 192.5 per 100,000 (30 cases)
 - Blaby; 189.8 per 100,000 (51 cases)
 - Oadby & Wigston; 184.5 per 100,000 (29 cases)
 - Harborough; 165.8 per 100,000 (45 cases)
- Rutland has a higher incidence rate of Covid-19 cases (184.3 per 100,000) than England for people aged 60+. This equates to 24 cases.

8. Leicestershire has seen an increase in the weekly rate of Covid-19 cases

- There has been an increase in the weekly rate of Covid-19 cases in Leicestershire from 523.9 (per 100,000 population) in week 45 of 2021 to 560.9 (per 100,000 population) in week 46 of 2021.
- As of week 46 (15th November to 21st November 2021), Leicestershire is ranked 12th (highest) out of 149 upper tier local authorities and ranked 2nd (highest) out of its CIPFA similar areas.

9. The MSOA with the highest count of Covid-19 cases in the last week was Mountsorrel and Rothley in Charnwood

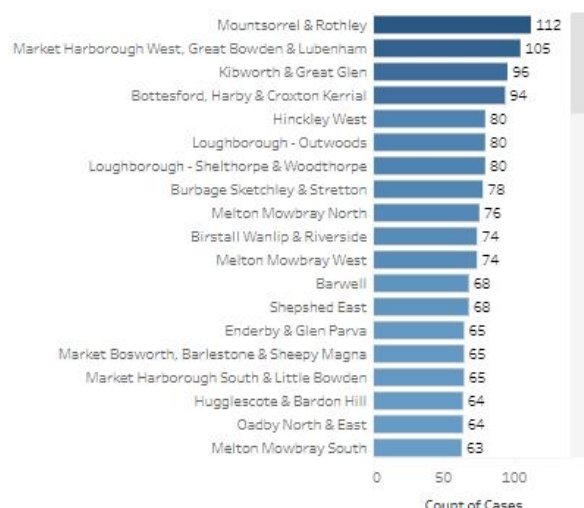

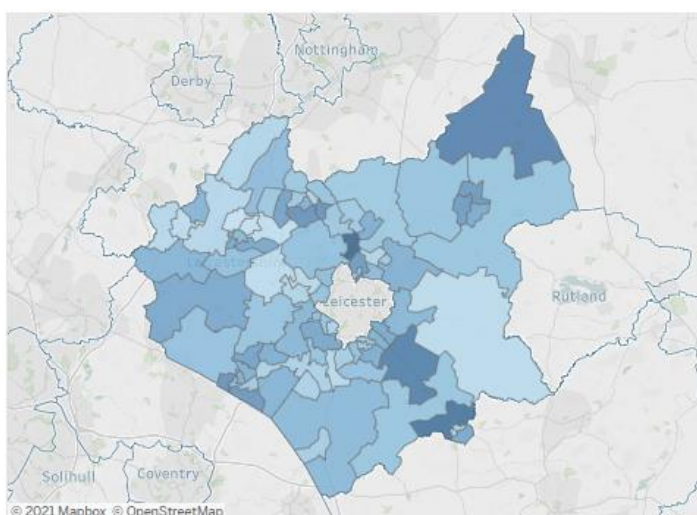

- Up to 23rd November (week 46 of 2021), the Middle Super Output Area (MSOA) with the highest count of confirmed cases of Covid-19 was Mountsorrel & Rothley with 112 reported cases. This was followed by:
 - Market Harborough West, Great Bowden & Lubenham (105)
 - Kibworth & Great Glen (96)
 - Bottesford, Harby & Croxton Kerrial (94)
 - Hinckley West (80); Loughborough – Outwoods (80); Loughborough – Shelthorpe & Woodthorpe (80)
 - Burbage Sketchley & Stretton (78)
 - Melton Mowbray North (76)
 - Birstall Wanlip & Riverside (74); Melton Mowbray West (74)
 - Barwell (68); Shepshed East (68)
 - Enderby & Glen Parva (65); Market Bosworth, Barlestone & Sheepy Magna (65); Market Harborough South & Little Bowden (65)
- All other areas recorded less than 65 cases in the last week.
- Areas that recorded between zero and two cases in the last week have been suppressed due to data disclosure and are represented as white in the map below.

10. Covid-19 Vaccination Uptake Summary

The following tables show a summary of Covid-19 vaccination uptake by Local Authority and District with a breakdown for the over 18 age cohort.

- Up to 21st November 2021, the Covid-19 dose 1 vaccination uptake for the over 18 age cohort was 88.0% in Leicestershire and 91.6% in Rutland. The Covid-19 dose 2 vaccination uptake for the over 18 age cohort in Leicestershire was 85.0%, whilst the dose 2 uptake in Rutland was 88.6%.

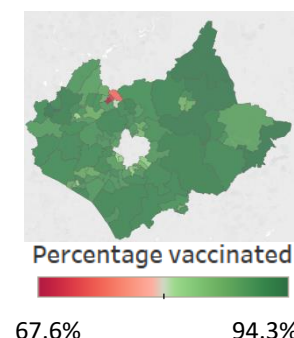

- Most districts (apart from Charnwood) have a Covid-19 dose 1 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 91.0% and Charnwood having the lowest with 84.6%. With the exception of Charnwood and Oadby and Wigston, all districts have a Covid-19 dose 2 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 88.4% and Charnwood having the lowest with 81.2%.

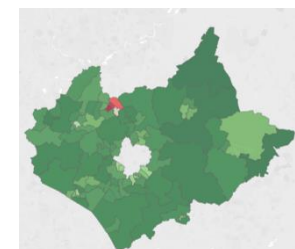

The following map shows a summary of Covid-19 vaccination uptake (dose 1) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 21st November 2021, Ashby de la Zouch South was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 94.3%. This was followed by:
 - Ketton, Ryhall & Luffenham; 93.8%
 - Bottesford, Harby & Croxton Kerrial; 93.2%
 - Ashby de la Zouch North; 93.2%
 - Waltham, Wymondham & Great Dalby; 93.1%
- Loughborough - University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 67.6%. This was followed by:
 - Loughborough Storer & Queen's Park; 68.8%
 - Loughborough Lemyngton & Hastings; 72.1%
 - Loughborough – Shelthorpe & Woodthorpe; 79.4%
 - Coalville; 81.9%

The following map shows a summary of Covid-19 vaccination uptake (dose 2) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 21st November 2021, Ketton, Ryhall & Luffenham was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 91.7%. This was followed by:
 - Ashby de la Zouch South; 91.1%
 - Bottesford, Harby & Croxton Kerrial; 91.1%
 - Waltham, Wymondham & Great Dalby; 91.0%
 - Tilton, Billesdon & Great Easton; 90.5%
- Loughborough – University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 62.7%. This was followed by:
 - Loughborough Storer & Queen's Park; 63.5%
 - Loughborough Lemyngton & Hastings; 66.5%
 - Loughborough – Shelthorpe & Woodthorpe; 75.4%
 - Coalville; 77.6%

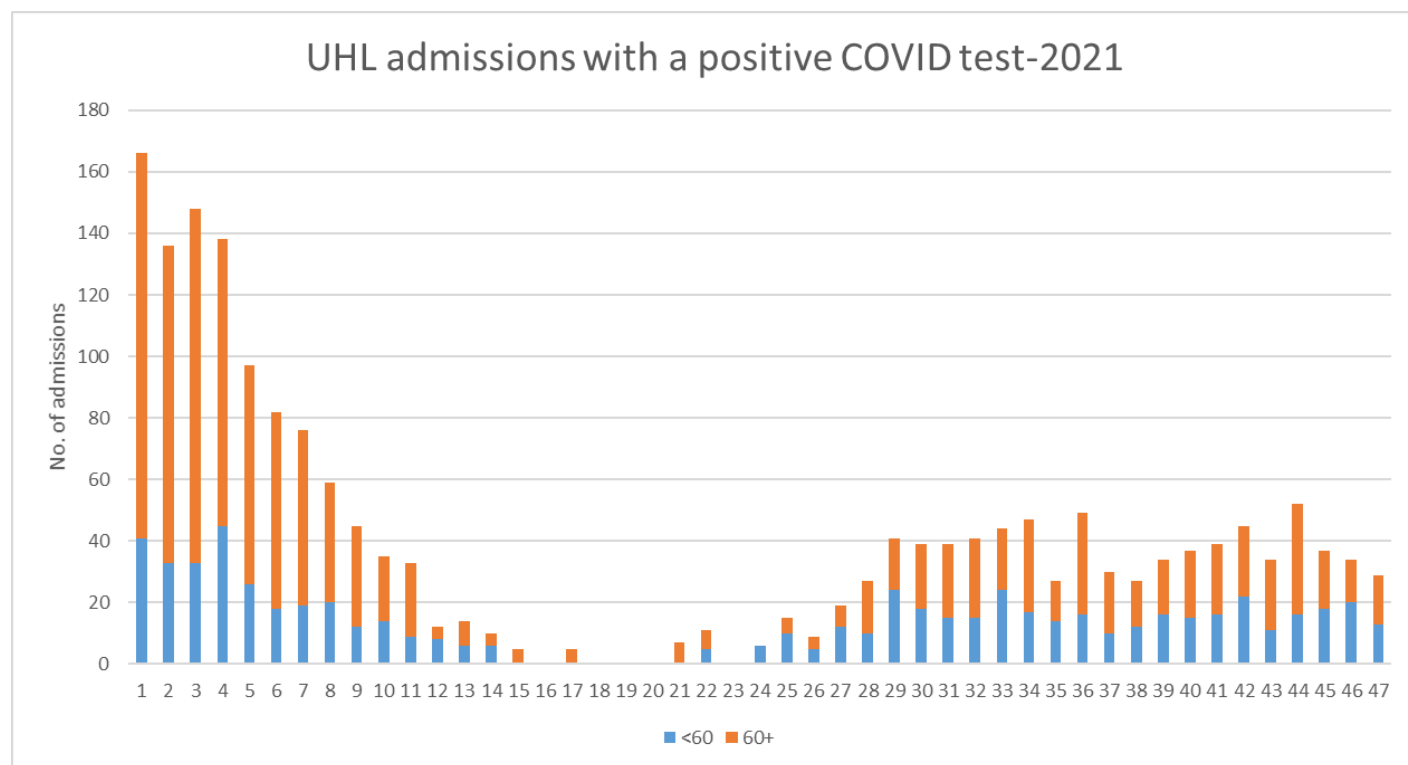

Percentage vaccinated

62.7%

91.7%

11. Admissions with Covid-19 to UHL

- Up to 27th November, 3,898 admissions with Covid-19 have been made to UHL by Leicestershire residents since the start of the pandemic.
- Patients aged 60+ account for just under three-quarters (71%) of all admissions from Leicestershire residents.
- In week 47 (21st November 2021 to 27th November 2021), there were 29 admissions with Covid-19 made to UHL by Leicestershire residents; 16 (55%) of these admissions were patients aged 60+.

Note: Counts less than three have been suppressed.

12. District Level Summary

- **Oadby & Wigston** continues to have the highest rate of Covid-19 cases and deaths in the county. The rate of cumulative cases is significantly higher in comparison to the England average.
- From the beginning of September to the 9th November, the weekly counts of cases had shown an increasing trend in Oadby and Wigston. Between the w/c 9th November and the w/c 28th December, the weekly counts of cases fluctuated. The weekly counts of cases then showed a declining trend until the third week of May. Between the third week of May and the 12th of July the weekly counts showed an increasing trend. Since then the weekly counts of cases have fluctuated in Oadby and Wigston.
- The weekly counts of cases have decreased from 331 in w/c 15th November to 243 in w/c 22nd November.
- The latest weekly count of deaths involving Covid-19 shows that no deaths occurred in Oadby & Wigston in week 46 of 2021.
- **North West Leicestershire** has the third lowest rate of Covid-19 cases and the second highest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From early September to the 9th November an increasing trend in the weekly counts of cases had been witnessed in North West Leicestershire. Following this, the weekly counts of cases decreased each week for four weeks. The weekly counts of cases then increased for three weeks, before showing a declining trend throughout January, February, March, April. Throughout May the count fluctuated, since then the count increased week on week until the w/c 12th July. The count of cases then decreased for 3 weeks before showing an increasing trend between the 2nd of August and the 20th September. Since then, the weekly counts of cases have decreased week on week with the exception of the weeks commencing the 15th and 22nd of November where the weekly counts of cases increased.
- The latest weekly counts of cases have decreased from 447 in w/c 15th November to 432 in w/c 22nd November.
- The latest weekly count of deaths shows one death involving Covid-19 occurred in North West Leicestershire in week 46 of 2021; this death occurred in a hospital.
- **Blaby** has the second highest rate of Covid-19 cases in the county and the third highest rate of deaths. The rate of cumulative cases is significantly higher compared to the England average.
- From mid-September, the weekly counts of cases in Blaby had shown an increasing trend, with a peak around the 9th of November. From then, the weekly counts of cases have fluctuated, with the exception of the last three weeks of December and the first week of January where the weekly counts of cases increased each week. From early January to mid May, the weekly counts of cases had shown a declining trend. Between mid May and the 20th of September, the weekly counts of cases showed increasing trend. Since then, the weekly counts of cases have fluctuated in Blaby.
- The latest weekly counts of cases have decreased from 551 in w/c 15th November to 407 in w/c 22nd November.
- The latest weeks data shows one death involving Covid-19 was recorded in Blaby in week 46 of 2021; this death occurred in a hospital.
- **Melton** has the lowest rate of Covid-19 cases and the fourth highest rate of deaths in the county. The rate of cumulative cases is significantly lower than the England average.
- From mid-September, the weekly counts of cases had been increasing week on week in Melton, showing a peak around the 9th of November. A second peak was witnessed around 28th of

December. Through January to the end of March weekly counts of cases had shown a declining trend, since then the weekly counts of cases in Melton had fluctuated until mid May. From mid May until w/c 12th July, the weekly count of cases increased week on week. The case count then decreased for 2 weeks before fluctuating over the past 17 weeks.

- The latest weekly count of cases have decreased from 332 in w/c 15th November to 322 in w/c 22nd November.
- The latest weekly count of deaths involving Covid-19 shows that no deaths occurred in Melton in week 46 of 2021.
- **Hinckley & Bosworth** has the fourth highest rate of Covid-19 cases and third lowest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From mid-September to the 9th of November, the weekly counts of cases had increased each week in Hinckley and Bosworth. The weekly counts of cases had fluctuated from November 9th to January 11th. From then until mid March the weekly counts of cases decreased, before fluctuating until late May. Since the end of May there has been an increasing trend in the weekly counts of cases, apart from over the last 18 weeks where the count of cases fluctuated.
- The latest weekly count of cases have decreased from 711 in w/c 15th November to 581 in w/c 22nd November.
- The latest weeks data shows three deaths involving Covid-19 were recorded in Hinckley & Bosworth in week 46 of 2021; two deaths occurred in a hospital and one death occurred in an 'other' setting.
- **Charnwood** has the third highest rate of Covid-19 cases and the second lowest rate of deaths in the county. The rate of cumulative cases is significantly higher in comparison to the England average.
- The weekly counts of cases in Charnwood had shown an increasing trend from early September to mid-October, showing a peak around the 19th of October. Between the 19th of October and the 23rd November the weekly counts of cases showed a declining trend. Following this, the weekly counts of cases increased each week in Charnwood, peaking around December 28th. The rate then showed a declining trend until the 3rd of May, before showing an increasing trend for 10 weeks. Since the 19th of July the weekly count of cases have fluctuated.
- The latest weekly counts of cases have decreased from 1,144 in w/c 15th November to 885 in w/c 22nd November.
- The latest weeks data shows three deaths involving Covid-19 were recorded in Charnwood in week 46 of 2021; two deaths occurred in a hospital and one death occurred in an 'other' setting.
- **Harborough** has the second lowest rate of Covid-19 cases and the lowest rate of deaths in the county. The rate of cumulative cases is significantly lower in comparison to the England average.
- From the beginning of September to the 9th November, the weekly counts of cases had shown an increasing trend in Harborough. Between the w/c 9th November and the w/c 7th December the weekly counts of cases showed a declining trend. Between then and December 28th, the weekly counts of cases had increased each week before showing a declining trend until the end of March. Throughout April and May the rate had fluctuated, before showing an increasing trend over the next seven weeks. Between the 19th of July and the 20th of September the weekly counts of cases showed an increasing trend. Since then, the weekly counts of cases have fluctuated.
- The latest weekly counts of cases have decreased from 550 in w/c 15th November to 421 in w/c 22nd November.
- The latest weeks data on death occurrences shows that no deaths involving Covid-19 were recorded in Harborough in week 46 of 2021.
