COVID-19: Data Update for Leicestershire
Period 7 April 2021 to 13 April 2021
Headline Summary

1. **Position Statement from the Director of Public Health for Leicestershire**

   Rates have continued to decline albeit at a slower rate, although there has been a significant increase in Melton in the last week. This week's figures will be important as the data reporting period will begin to show an effect for the April 12th easements.

2. **Trend in Weekly Incidence Rate (All ages) – Leicester, Leicestershire, Rutland and England**

- The national rate has decreased from 29.0 (period 6th Apr to 12th Apr) to 27.9 per 100,000 population (period 7th Apr to 13th Apr). This latest rate reflects a percentage change decrease of 5% compared to the previous 7 day period for England.
- The Leicestershire rate has decreased from 37.8 (period 6th Apr to 12th Apr) to 37.1 per 100,000 population (period 7th Apr to 13th Apr). This latest rate reflects a percentage change decrease of 2% compared to the previous 7 day period for Leicestershire. The rate in Leicestershire is higher than the national average.
- The rate for Leicester City stands at 72.8 per 100,000 population and is above the national average. The rate for Rutland stands at 30.1 per 100,000 population and is above the national average.
