# What have we learnt from the newly released Covid-19 data?

A series of publicly available dashboards examining Covid-19 cases, deaths involving Covid-19 and a district summary are available at the below links. A summary narrative to support the data in these dashboards then follows.

- [Deaths involving Covid-19](#)
- [Covid-19 Summary at District Level](#)
- [PHE Weekly Covid-19 Cases](#)

## 1. 19 deaths<sup>1</sup> involving Covid-19 were recorded in Leicestershire in the last week

- As of week 2 2022 (up to 14<sup>th</sup> January), there has been a total of 1,807 deaths in Leicestershire. The weekly count of deaths has increased from 10 deaths in week 1 of 2022 to 19 deaths in week 2 of 2022.
- Of all deaths involving Covid-19 in Leicestershire, 1,235 (68.3%) were in hospital and 431 (23.9%) were in a care home.
- In week 2 in Leicestershire, there were 16 deaths in a hospital and 3 deaths in a care home.

<sup>1</sup> Death counts are based on death occurrences. The death is counted as involving Covid-19 if Covid-19 was mentioned on the death certificate. Please note, Covid-19 may not have been confirmed by a test. Source: [Office for National Statistics](#) (2021)

**Deaths (numbers) by local authority and place of death, for deaths that occurred up to 14<sup>th</sup> January 2022 but were registered up to 22<sup>nd</sup> January 2022.**

	Care Home		Elsewhere		Home		Hospice		Hospital		Total				Population

## 2. There were no excess deaths recorded in Leicestershire in the last week

- Counts of excess deaths in Leicestershire have fluctuated over the last 10 weeks. The number of all deaths seen has decreased from week 1 2022 to week 2 2022. The latest figures from ONS show that 122 deaths occurred in Leicestershire in week 2 of 2022. There were no excess deaths reported in the last week.
- The latest weeks data shows that there were 19 deaths that mentioned Covid-19 on the death certificate in week 2.

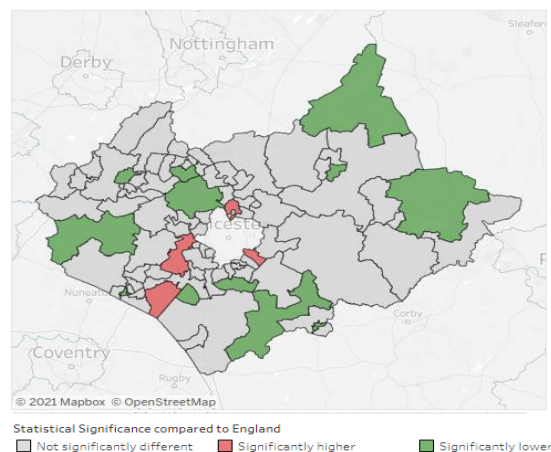

### 3. Two areas in Blaby, one area in Charnwood and one area in Oadby and Wigston has a significantly higher percentage of deaths involving Covid-19 than the national percentage

Note: There is no further update available for this data.

- The map below examines the statistical significance compared to England, of the percentage of deaths involving Covid-19 by Middle Layer Super Output Area (MSOA) in Leicestershire and Rutland. These deaths occurred between 1<sup>st</sup> March 2020 and 30<sup>th</sup> April 2021.
- Stoney Stanton, Sapcote & Sharnton in Blaby recorded 33 deaths involving Covid-19 in this time period, this represented 27.3% of all deaths. Kirby Muxloe and Thurlaston in Blaby recorded 31 deaths involving Covid-19 in this time period, this represented 26.7% of all deaths. Birstall Wanlip & Riverside in Charnwood recorded 30 deaths involving Covid-19 in this time period, this represented 24.6% of all deaths. Oadby North & East in Oadby and Wigston recorded 38 deaths involving Covid-19 which represented 23.6% of all deaths.
- Nationally, deaths involving Covid-19 made up under a fifth (17.1%) of all deaths.
- 12 MSOAs in Leicestershire and Rutland have a significantly lower percentage of deaths involving Covid-19 compared to England. These are:
  - Market Bosworth, Barlestone & Sheepy Magna in Hinckley and Bosworth (11, 10.0%)
  - Bottesford, Harby & Croxton Kerrial in Melton (12, 9.9%)
  - Loughborough – Outwoods in Charnwood (10, 9.6%)
  - Market Harborough Central in Harborough (10, 8.7%)
  - Broughton Astley in Harborough (8, 8.6%)
  - Thurgate, Woodhouse & Bradgate in Charnwood (8, 8.3%)
  - Market Overton, Cottesmore & Empingham in Rutland (6, 8.3%)
  - Countesthorpe & Kilby in Blaby (6, 8.3%)
  - Thringstone & Swannington in North West Leicestershire (7, 7.8%)
  - Hinckley Clarendon Park in Hinckley and Bosworth (5, 7.7%)
  - Melton Mowbray South in Melton (7, 7.2%)
  - Fleckney, Kilworth & Foxton in Harborough (7, 5.7%)
- Further data examining deaths involving Covid-19 by local area is available in the dashboard available at [this link](#).

**Statistical Significance compared to England of the deaths involving Covid-19 by Middle Layer Super Output Area, Leicestershire and Rutland, deaths occurring between 1<sup>st</sup> March 2020 and 30<sup>th</sup> April 2021.**

## 4. Weekly counts of cases have decreased in the past week in Leicestershire

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

- As of 23<sup>rd</sup> January, Leicestershire has recorded a total of 177,280 lab-confirmed cases of Covid-19. This data relates to pillar 1 and 2 cases.
- From January 11<sup>th</sup> to the beginning of May, cases had been decreasing. From then to mid July the cases increased before decreasing in w/c 19<sup>th</sup> July. Between then and the w/c 27<sup>th</sup> December the weekly counts of cases showed an increasing trend, with the exception of the weeks between the 20<sup>th</sup> September and the 1<sup>st</sup> November where the weekly counts of cases showed a decreasing trend. Since the w/c 27<sup>th</sup> December, the weekly counts of cases have decreased week on week.
- The latest weekly data shows 6,856 cases have been confirmed in Leicestershire in the last week. This count has decreased compared to the previous week where 7,021 cases were confirmed.

## 5. Oadby and Wigston has the highest weekly incidence rate of Covid-19 cases for people of all ages in the county

Note: Public Health England has updated the way cases are reported in England. Reported cases are sometimes removed if subsequent tests are negative. This happens when cases identified through a positive rapid lateral flow test are followed by polymerase chain reaction (PCR) tests within 3 days that are all negative. This means cases may be retroactively removed or changed and as such the data may fluctuate.

- The incidence rate for Covid-19 cases in Leicestershire had shown a declining trend between the beginning of January and the final week of April. The incidence rate in Leicestershire then fluctuated between the final week of April and the middle of May. The incidence rate then increased until the 16<sup>th</sup> of July. Between then and the end of October, the incidence rate fluctuated before showing an increasing trend until the 1<sup>st</sup> January 2022. Since then, the incidence rate in Leicestershire has shown a decreasing trend. The incidence rate in Leicestershire (1035.5 per 100,000 population) is higher than the national rate (985.0 per 100,000 population) as of 16<sup>th</sup> January 2022.
- The latest weekly incidence rates of Covid-19 cases for people of all ages (as of 16<sup>th</sup> January) show that the following area rates in Leicestershire are higher than the national rate (985.0 per 100,000 population):
  - Oadby & Wigston; 1233.6 per 100,000 (707 cases)
  - Melton; 1111.0 per 100,000 (571 cases)
  - North West Leicestershire; 1088.6 per 100,000 (1141 cases)
  - Harborough; 1054.0 per 100,000 (1007 cases)
  - Blaby; 1026.0 per 100,000 (1046 cases)
- The following area rates in Leicestershire are lower than the national rate (985.0 per 100,000 population):
  - Hinckley & Bosworth; 966.9 per 100,000 (1099 cases)
  - Charnwood; 962.2 per 100,000 (1813 cases)
- Rutland has a higher incidence rate of Covid-19 cases (1141.4 per 100,000) than England for people of all ages. This equates to 462 cases.

## 6. North West Leicestershire has the highest weekly incidence rate of Covid-19 cases for people aged 17-21 in the county

- Between the 5<sup>th</sup> of January and the 5<sup>th</sup> of April the weekly incidence rate of Covid-19 for people aged 17-21 had been declining. From the 5<sup>th</sup> of April to the end of May the rate fluctuated. Between then and the 1<sup>st</sup> January 2022, the weekly incidence rate of Covid-19 for people aged 17-21 in Leicestershire has shown an increasing trend, with the exception of the period between the 14<sup>th</sup> of July and the 23<sup>rd</sup> of July and the 5<sup>th</sup> of August to the 5<sup>th</sup> of October where the incidence rate declined, and the 5<sup>th</sup> October to the 31<sup>st</sup> of October and the 8<sup>th</sup> November to the 4<sup>th</sup> December where the rate fluctuated. Since the 1<sup>st</sup> January 2022, the incidence rate has shown a decreasing trend.
- As of the 16<sup>th</sup> January, the rate for Leicestershire (705.7 per 100,000 population) is lower than the national rate for people aged 17-21 (790.3 per 100,000 population).
- The latest weekly incidence rates of Covid-19 cases for people aged 17-21 (as of 16<sup>th</sup> January) show that the following area rates in Leicestershire are higher than the national rate (790.3 per 100,000 population):
  - North West Leicestershire; 949.5 per 100,000 (47 cases)
  - Hinckley & Bosworth; 924.5 per 100,000 (47 cases)
- The following area rates in Leicestershire are lower than the national rate (790.3 per 100,000 population):
  - Harborough; 773.7 per 100,000 (33 cases)
  - Oadby & Wigston; 758.7 per 100,000 (31 cases)
  - Melton; 705.5 per 100,000 (16 cases)
  - Blaby; 616.7 per 100,000 (28 cases)
  - Charnwood; 567.1 per 100,000 (99 cases)
- Rutland has a higher incidence rate of Covid-19 cases (883.4 per 100,000) than England for people aged 17-21. This equates to 15 cases.

## 7. Oadby and Wigston has the highest weekly incidence rate of Covid-19 cases for people aged 60+ in the county

- The incidence rate for Covid-19 cases in people aged 60+ in Leicestershire showed a declining trend between the beginning of January and the middle of May, with the exception of the first two weeks of April where the rate showed an increasing trend. From the middle of May to the first week of June the rate showed an increasing trend, before fluctuating for two weeks. Between then and the 1<sup>st</sup> January 2022, the rate has shown an increasing trend, with the exception of the period between the 18<sup>th</sup> of July and the 30<sup>th</sup> of July and the 5<sup>th</sup> of September to the 3<sup>rd</sup> of October where the incidence rate fluctuated and between the 26<sup>th</sup> of October and the 9<sup>th</sup> of December where the rate showed a decreasing trend. Since the 1<sup>st</sup> January 2022, the incidence rate has shown a decreasing trend. The rate for Leicestershire (417.8 per 100,000 population) is higher than the national rate (392.5 per 100,000 population) as of 16<sup>th</sup> January.
- The latest weekly incidence rates of Covid-19 cases for people aged 60+ (as of 16<sup>th</sup> January) show that the following area rates in Leicestershire are higher than the national rate (392.5 per 100,000 population):
  - Oadby & Wigston; 515.3 per 100,000 (81 cases)
  - Hinckley & Bosworth; 479.2 per 100,000 (155 cases)
  - Blaby; 472.6 per 100,000 (127 cases)
  - Melton; 410.6 per 100,000 (64 cases)
  - Charnwood; 396.4 per 100,000 (176 cases)
- The following area rates in Leicestershire are lower than the national rate (392.5 per 100,000 population):
  - Harborough; 375.7 per 100,000 (102 cases)
  - North West Leicestershire; 316.6 per 100,000 (87 cases)
- Rutland has a lower incidence rate of Covid-19 cases (353.2 per 100,000) than England for people aged 60+. This equates to 46 cases.

## 8. Leicestershire has seen a decrease in the weekly rate of Covid-19 cases

- There has been a decrease in the weekly rate of Covid-19 cases in Leicestershire from 1602.5 (per 100,000 population) in week 1 of 2022 to 974.9 (per 100,000 population) in week 2 of 2022.
- As of week 2 (10<sup>th</sup> January to 16<sup>th</sup> January 2022), Leicestershire is ranked 70<sup>th</sup> (highest) out of 149 upper tier local authorities and ranked 8<sup>th</sup> (highest) out of its CIPFA similar areas.

## 9. The MSOA with the highest count of Covid-19 cases in the last week was Oadby North and East in Oadby and Wigston

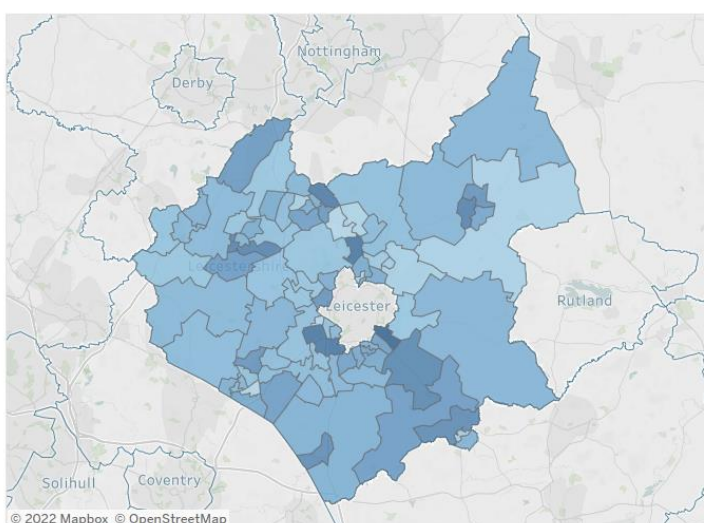

- Up to 18<sup>th</sup> January 2022 (week 2 of 2022), the Middle Super Output Area (MSOA) with the highest count of confirmed cases of Covid-19 was Oadby North & East with 171 reported cases.
- This was followed by:
  - Enderby & Glen Parva (152)
  - Mountsorrel & Rothley (150)
  - Loughborough Lemyngton & Hastings (144)
  - Melton Mowbray West (139)
  - Hugglescote & Bardon Hill (136)
  - Kibworth & Great Glen (135)
  - Market Harborough West, Great Bowden & Lubenham (131)
  - Lutterworth (129)
  - Barwell (120); Melton Mowbray North (120)
  - Glenfield (117)
  - Loughborough – Shelthorpe & Woodthorpe (114)
  - Castle Donington (113)
  - Fleckney, Kilworth & Foxton (112); Ibstock & Ellistown (112)
  - Stoney Stanton, Sapcote & Sharnford (110)
- All other areas recorded less than 110 cases in the last week.
- Areas that recorded between zero and two cases in the last week have been suppressed due to data disclosure and are represented as white in the map below.

Weekly Counts of Lab-confirmed Covid-19 cases by Middle Layer Super Output Area, Leicester, Leicestershire and Rutland

Date as number: 18/01/2022  
 Local Authority: Leicestershire

COVID-19 Cases:  
 0 171

## 10. Covid-19 Vaccination Uptake Summary

The following tables show a summary of Covid-19 vaccination uptake by Local Authority and District with a breakdown for the over 18 age cohort.

- Up to 16<sup>th</sup> January 2022, the Covid-19 dose 1 vaccination uptake for the over 18 age cohort was 88.8% in Leicestershire and 92.2% in Rutland. The Covid-19 dose 2 vaccination uptake for the over 18 age cohort in Leicestershire was 86.4%, whilst the dose 2 uptake in Rutland was 89.9%. The Covid-19 booster or 3<sup>rd</sup> dose vaccination uptake for the over 18 age cohort in Leicestershire was 71.2% in Leicestershire and 76.2% in Rutland.

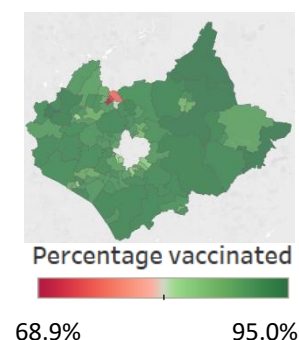

- All districts have a Covid-19 dose 1 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 91.7% and Charnwood having the lowest with 85.6%. With the exception of Charnwood and Oadby and Wigston, all districts have a Covid-19 dose 2 vaccination uptake for the over 18 age cohort of at least 85%, with Harborough having the highest uptake with 89.8% and Charnwood having the lowest with 82.7%. Harborough is the Leicestershire district with the highest vaccination uptake for the booster or 3<sup>rd</sup> dose with 78.0%, whilst Charnwood has the lowest booster or 3<sup>rd</sup> dose vaccination uptake with 65.7%.

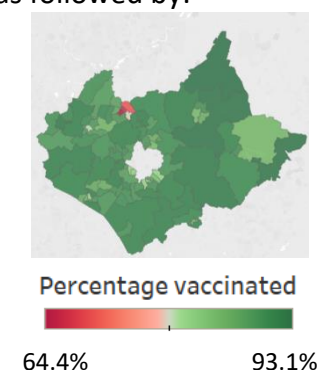

The following map shows a summary of Covid-19 vaccination uptake (dose 1) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 16<sup>th</sup> January 2022, Ashby de la Zouch South was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 95.0%. This was followed by:
  - Ketton, Ryhall & Luffenham; 94.4%
  - Ashby de la Zouch North; 93.7%
  - Bottesford, Harby & Croxton Kerrial; 93.7%
  - Waltham, Wymondham & Great Dalby; 93.6%
- Loughborough - University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 68.9%. This was followed by:
  - Loughborough Storer & Queen's Park; 70.7%
  - Loughborough Lemyngton & Hastings; 73.8%
  - Loughborough – Shelthorpe & Woodthorpe; 80.7%
  - Coalville; 83.2%

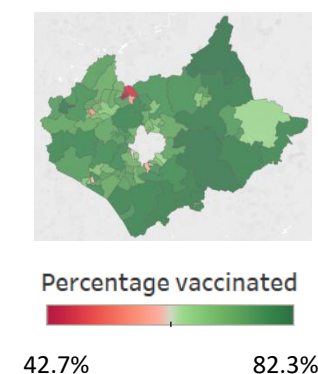

The following map shows a summary of Covid-19 vaccination uptake (dose 2) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 16<sup>th</sup> January 2022, Ashby de la Zouch South was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 93.1%. This was followed by:
  - Ketton, Ryhall & Luffenham; 92.6%
  - Bottesford, Harby & Croxton Kerrial; 92.2%
  - Waltham, Wymondham & Great Dalby; 92.1%
  - Ashby de la Zouch North; 91.9%
- Loughborough – University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 64.4%. This was followed by:
  - Loughborough Storer & Queen's Park; 65.5%
  - Loughborough Lemyngton & Hastings; 68.8%
  - Loughborough – Shelthorpe & Woodthorpe; 77.0%
  - Coalville; 79.6%

The following map shows a summary of Covid-19 vaccination uptake (booster or 3<sup>rd</sup> dose) in Leicestershire and Rutland by Middle Super Output Area (MSOA) for the over 18 age cohort.

- Up to 16<sup>th</sup> January 2022, Bottesford, Harby & Croxton Kerrial was the MSOA with the highest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 82.3%. This was followed by:
  - Ketton, Ryhall & Luffenham; 81.7%
  - Ashby de la Zouch South; 81.3%
  - Tilton, Billesdon & Great Easton; 80.8%
  - Waltham, Wymondham & Great Dalby; 80.6%
- Loughborough – University was the MSOA with the lowest Covid-19 vaccination uptake for the over 18 age cohort with an uptake of 42.7%. This was followed by:
  - Loughborough Storer & Queen's Park; 44.5%
  - Loughborough Lemyngton & Hastings; 46.3%
  - Coalville; 58.3%
  - Loughborough – Shelthorpe & Woodthorpe; 58.4%

## 11. Admissions with Covid-19 to UHL

- Up to 22<sup>nd</sup> January, 4,585 admissions with Covid-19 have been made to UHL by Leicestershire residents since the start of the pandemic.
- Patients aged 60+ account for just under three-quarters (69%) of all admissions from Leicestershire residents.
- In week 3 (16<sup>th</sup> January 2022 to 22<sup>nd</sup> January 2022), there were 84 admissions with Covid-19 made to UHL by Leicestershire residents; 45 (54%) of these admissions were patients aged 60+.

Note: Counts less than three have been suppressed.

## 12. District Level Summary

- **Oadby & Wigston** continues to have the highest rate of Covid-19 cases and deaths in the county. The rate of cumulative cases is significantly higher in comparison to the England average.
- From the beginning of September to the 9<sup>th</sup> November, the weekly counts of cases had shown an increasing trend in Oadby and Wigston. Between the w/c 9<sup>th</sup> November and the w/c 28<sup>th</sup> December, the weekly counts of cases fluctuated. The weekly counts of cases then showed a declining trend until the third week of May. Between the third week of May and the 12<sup>th</sup> of July the weekly counts showed an increasing trend. Following this, the weekly counts of cases fluctuated in Oadby and Wigston before showing an increasing trend from the w/c 6<sup>th</sup> December to the w/c 27<sup>th</sup> December. Since the w/c 27<sup>th</sup> December, a decreasing trend in the weekly counts of cases has been witnessed in Oadby and Wigston.
- The weekly counts of cases have increased from 631 in w/c 10<sup>th</sup> January to 659 in w/c 17<sup>th</sup> January.
- The latest weekly count of deaths involving Covid-19 shows that one death occurred in Oadby & Wigston in week 2 of 2022; this death occurred in a care home.
- **North West Leicestershire** has the third lowest rate of Covid-19 cases and the second highest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From early September to the 9<sup>th</sup> November an increasing trend in the weekly counts of cases had been witnessed in North West Leicestershire. Following this, the weekly counts of cases decreased each week for four weeks. The weekly counts of cases then increased for three weeks, before showing a declining trend throughout January, February, March and April. Throughout May the count fluctuated, since then the count increased week on week until the w/c 12<sup>th</sup> July. The count of cases then decreased for 3 weeks before showing an increasing trend between the 2<sup>nd</sup> of August and the 20<sup>th</sup> September. Since then, the weekly counts of cases have decreased week on week with the exception of the period between w/c 8<sup>th</sup> November and w/c 27<sup>th</sup> December where the weekly counts of cases showed an increasing trend.
- The latest weekly counts of cases have decreased from 1,106 in w/c 10<sup>th</sup> January to 1,009 in w/c 17<sup>th</sup> January.
- The latest weekly count of deaths shows three deaths involving Covid-19 occurred in North West Leicestershire in week 2 of 2022; all three deaths occurred in a hospital.
- **Blaby** has the second highest rate of Covid-19 cases in the county and the third highest rate of deaths. The rate of cumulative cases is significantly higher compared to the England average.
- From mid-September, the weekly counts of cases in Blaby had shown an increasing trend, with a peak around the 9<sup>th</sup> of November. From then, the weekly counts of cases have fluctuated, with the exception of the last three weeks of December and the first week of January where the weekly counts of cases increased each week. From early January to mid May, the weekly counts of cases had shown a declining trend. Between mid May and the 20<sup>th</sup> of September, the weekly counts of cases showed increasing trend. Between the 20<sup>th</sup> September and the 1<sup>st</sup> November the weekly counts of cases fluctuated in Blaby. Since then, the weekly counts of cases have shown an increasing trend, with the exception of the last three weeks where the count of cases has shown a decreasing trend.
- The latest weekly counts of cases have decreased from 1,014 in w/c 10<sup>th</sup> January to 920 in w/c 17<sup>th</sup> January.
- The latest weeks data shows that four deaths involving Covid-19 were recorded in Blaby in week 2 of 2022; all four deaths occurred in a hospital.

- **Melton** has the lowest rate of Covid-19 cases and the fourth highest rate of deaths in the county. The rate of cumulative cases is significantly lower than the England average.
- From mid-September, the weekly counts of cases had been increasing week on week in Melton, showing a peak around the 9<sup>th</sup> of November. A second peak was witnessed around 28<sup>th</sup> of December. Through January to the end of March weekly counts of cases had shown a declining trend, since then the weekly counts of cases in Melton had fluctuated until mid May. From mid May until w/c 12<sup>th</sup> July, the weekly count of cases increased week on week. The case count then decreased for 2 weeks before fluctuating until the 6<sup>th</sup> of December, after which the weekly counts of cases showed an increasing trend to the w/c 27<sup>th</sup> December. Since then, the weekly counts of cases have shown a decreasing trend.
- The latest weekly count of cases have increased from 513 in w/c 10<sup>th</sup> January to 597 in w/c 17<sup>th</sup> January.
- The latest weekly count of deaths involving Covid-19 shows that one death occurred in Melton in week 2 of 2022; this death occurred in a care home.
- **Hinckley & Bosworth** has the fourth highest rate of Covid-19 cases and third lowest rate of deaths in the county. The rate of cumulative cases is significantly higher than the England average.
- From mid-September to the 9<sup>th</sup> of November, the weekly counts of cases had increased each week in Hinckley and Bosworth. The weekly counts of cases had fluctuated from November 9<sup>th</sup> to January 11<sup>th</sup>. From then until mid March the weekly counts of cases decreased, before fluctuating until late May. Between the end of May and the 12<sup>th</sup> July there was an increasing trend in the weekly counts of cases. Between then and the w/c 22<sup>nd</sup> November the count of cases fluctuated, before showing an increasing trend until the w/c 27<sup>th</sup> December. Since then, the weekly counts of cases have shown a decreasing trend.
- The latest weekly count of cases have decreased from 1,097 in w/c 10<sup>th</sup> January to 1,001 in w/c 17<sup>th</sup> January.
